Why Did He Kill? Nov 10 2020 "Klaus Schmitt was a wanted child. Coming from a wealthy family, he was expected to carry on the family name and succeed his father in the family business. During his early years, Klaus showed signs that he may not be the perfect son his father dreamed of having. As a youth, he gravitated toward the troublemakers in his peer group. When he became involved in a serious police matter his father disowned him and his mother attempted to change his behavior by enacting a strict policy of tough love. But her attempt backfired as Klaus became a seething inferno and developed a split personality. As he unleashed his anger he became a hunter and women became his prey. Cunning and diabolical he left no trace evidence at any of his murder scenes and it appeared that he might never be caught. But, when one of his victims managed to escape from his clutches everything changed."

Advances in the Sociology of Trust and Cooperation Sep 08 2020 The problem of cooperation is one of the core issues in sociology and social science more in general. The key question is how humans, groups, organizations, institutions, and countries can avoid or overcome the collective good dilemmas that could lead to a Hobbesian "war of all against all". The chapters in this book provide state of the art examples of research on this crucial topic. These include theoretical, laboratory, and field studies on trust and cooperation, thereby approaching the issue in three complementary and synergetic ways. The theoretical work covers articles on trust and control, reputation formation, and paradigmatic articles on the benefits and caveats of abstracting reality into models. The laboratory studies test the implications of different models of trust and reputation, such as the effects of social and institutional embeddedness and the potentially emerging inequalities this may cause. The field studies test these implications in applied settings such as business purchasing and supply, informal care, and different kinds of collaboration networks. This book is exemplary for rigorous social science. The focus is on effects of social conditions, in particular different forms of social and institutional embeddedness, on social outcomes at the macro level. Modelling efforts are applied to connect social conditions to social outcomes through micro-level behavior in ways that are easily overlooked when argumentation is intuitive and impressionistic. The book sets forth a mixed-method approach by applying different empirical methods to test hypotheses about similar questions. Several contributions re-evaluate the theoretical strengths and weaknesses following from the laboratory and field studies. Improving the theory in light of these findings facilitates pushing the boundaries of social science .

Where the Suckers Moon Nov 22 2021 "For all the right reasons." "Cars that can." "What to Drive." "The perfect Car for an Imperfect World." Only one of these slogans would be chosen by Subaru of America to sell its cars in the recession year of 1991. As six advertising agencies scrambled for the account and the winner tried to churn out the Big Idea that would install Subaru in the collective national unconscious, Randall Rothenberg was there, observing every nuance of the chaos, comedy, creativity, and egotism that made up an ad campaign. One can read Rothenberg's book as the behind-the-scenes chronicle of the brief and very troubled marriage between a beleaguered automobile company and Wieden & Kennedy, an aggressively hip ad agency whose creative director despised cars. One can read it as a history of advertising's journey

from the conventionally upbeat slogan "Helps Build Strong Bodies 12 Ways" to the supercool nineties minimalism of "Bo Knows." Either way, Where the Suckers Moon is a face-paced, insightful, and occasionally appalling look at an industry whose obsession with image has affected our entire culture.

Lemon-Aid New Cars and Trucks 2011 Aug 27 2019 As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, fess up."

Ecopiety May 05 2020 Tackles a human problem we all share?the fate of the earth and our role in its future Confident that your personal good deeds of environmental virtue will save the earth? The stories we encounter about the environment in popular culture too often promote an imagined moral economy, assuring us that tiny acts of voluntary personal piety, such as recycling a coffee cup, or purchasing green consumer items, can offset our destructive habits. No need to make any fundamental structural changes. The trick is simply for the consumer to buy the right things and shop our way to a greener future. It's time for a reality check. Ecopiety offers an absorbing examination of the intersections of environmental sensibilities, contemporary expressions of piety and devotion, and American popular culture. Ranging from portrayals of environmental sin and virtue such as the eco-pious depiction of Christian Grey in Fifty Shades of Grey, to the green capitalism found in the world of mobile-device "carbon sin-tracking" software applications, to the socially conscious vegetarian vampires in True Blood, the volume illuminates the work pop culture performs as both a mirror and an engine for the greening of American spiritual and ethical commitments. Taylor makes the case that it is not through a framework of grim duty or obligation, but through one of play and delight, that we may move environmental ideals into substantive action.
