[Creativity in the Classroom](#) May 29 2022 Creativity in the Classroom: An Innovative Approach to Integrate Arts Education provides curricular ideas for enhancing creative work in the classroom through the lens of integrative arts. The authors, both Art and Music Educators, provide practical ways in which to engage in creative thinking and making that can be applied to a variety of educational settings. Their work stems from years in the classroom teaching an integrative arts course at a public school in the United States. Through exploring big ideas such as identity, expression, storytelling, impact, and reaction, students learn to engage in a variety of creative art forms and work with others to create work that is meaningful. Each unit or big idea of study includes an explanation of the philosophy behind the unit, an overview of project ideas, and sample student workbook pages. Assessment strategies are provided with sample rubrics for evaluating student work.

**Environmental Ethics** Feb 23 2022 This well-constructed, and highly original, sourcebook integrates educational materials for teaching environmental ethics with theoretical reflections. The book is set to contribute immensely to its aim of taking

ethics out of philosophy departments and putting it into the streets, into villages, and on the Earth—to make ethics an everyday activity, not something left to experts and specialists. Context-based activities are presented in almost every chapter. While it acknowledges foundational theories in environmental ethics, and the work that they continue to do, it wholeheartedly embraces a growing body of literature that emphasises contextual, process-oriented, and place-based approaches to ethical reflection, deliberation, and action. It walks on the ground and isn't afraid to get a little dirty or to seek joy in earthly relationships. And it ultimately breaks with much Western academic tradition by framing “ethics in a storied world”, thus making room to move beyond Euro-American perspectives in environmental issues. This work will be of interest to school teachers and other non-formal and informal educators, teacher educators, college instructors, university professors, and other professionals who wish to bring environmental ethics to the forefront of their pedagogical practices.

Creating Vibrant Art Lesson Plans Jul 27 2019 Writing lesson plans is often considered busywork, but it can be a useful path for discovering what's important about artmaking and teaching. This book shows teachers how to slow down, breathe, and linger over the process of unit and lesson plan writing to uncover how much this process can support them professionally, creatively, and personally. The user-friendly text offers guidance for selecting an art project for the unit and then zooms into the nitty-gritty of specific lesson plans, including how to identify materials for a project and how to construct classroom dialogue to help students develop ideas for their artwork. The text also considers standards, assessments, and extensions to other subject areas. Featuring accessible language, clear definitions, practical examples, and self-reflection prompts, this unique resource will help pre- and inservice teachers create lesson plans that are useful to their specific contexts and methods of teaching. “If you happen to be feeling weary, frustrated, or uninspired, this book sparks imagination, fuels hope, and gives you theories to support what you know needs to be done.” —From the Foreword by P. Bruce Uhrmacher, Christy McConnell Moroye, and Bradley Conrad, educational researchers “Baxter invites us to slow down and consider the lesson plan as a creative catalyst to inspire our own artmaking, as well as a space to examine why and what we teach.” —Lisa Hochtritt, Maryland Institute College of Art “An inspiring and playful resource that is much more rewarding than typical lesson planning. It will surely spark your imagination with every flip of the page.” —Hailey Adlard, art educator, Parkland School District, PA

Delivering Authentic Arts Education 4e May 05 2020 This market-leading practical text helps student teachers develop their confidence, understanding and skills to effectively and authentically teach arts. With a strong balance between theory and practice, Delivering Authentic Arts Education outlines the true nature of the key learning area of arts education and its importance in the curriculum, emphasising the arts as forms of creative activity, meaning-making and expression in a cultural context. Initial chapters discuss how to recognise and build on existing artistic abilities and pedagogical skills, how to encourage children's creativity, how to lead arts appreciation experiences, and the general principles of planning and assessment. Part 2 specifically examines the five arts areas: dance, drama, media arts, music and visual arts. The final part of the text, Units of Inquiry, contains valuable sample learning activities and resources that demonstrate how to plan an effective lesson within a unit of inquiry.

**Social Justice Art** Oct 22 2021 In this lively and groundbreaking book, arts educator Marit Dewhurst examines why art is an effective way to engage students in thinking about the role they might play in addressing social injustice. Based on interviews and observations of sixteen high schoolers participating in an activist arts class at a New York City museum, Dewhurst identifies three learning processes common to the act of creating art that have an impact on social justice: connecting, questioning, and translating. Noting that “one of the challenges of social justice art education has been the difficulty of naming effective strategies that can be used across multiple contexts,” Dewhurst outlines core strategies for an “activist arts pedagogy” and offers concrete suggestions for educators seeking to incorporate activist art projects inside or outside formal school settings. Social Justice Art seeks to give common language to educators and others who are looking to expand and refine their practices in an emerging field, whether they work in art education, social justice programming, or youth development.

Information Arts Jun 17 2021 An introduction to the work and ideas of artists who use—and even influence—science and technology. A new breed of contemporary artist engages science and technology—not just to adopt the vocabulary and gizmos, but to explore and comment on the content, agendas, and possibilities. Indeed, proposes Stephen Wilson, the role of the artist is not only to interpret and to spread scientific knowledge, but to be an active partner in determining the direction of research. Years ago, C. P. Snow wrote about the “two cultures” of science and the humanities; these developments may finally help to change the outlook of those who view science and technology as separate from the general culture. In this rich compendium, Wilson offers the first comprehensive survey of international artists who incorporate concepts and research from mathematics, the physical sciences, biology, kinetics, telecommunications, and experimental digital systems such as artificial intelligence and ubiquitous computing. In addition to visual documentation and statements by the artists, Wilson examines relevant art-theoretical writings and explores emerging scientific and technological research likely to be culturally significant in the future. He also provides lists of resources including organizations, publications, conferences, museums, research centers, and Web sites.

The Forest and the City Oct 29 2019 Amsterdamse Bos, Bois de Boulognes, Epping Forest, Hong Kong's country parks, Stanley Park: throughout history cities across the world have developed close relationships with nearby woodland areas. In some cases, cities have even developed – and in some cases are promoting – a distinct ‘forest identity’. This book introduces the rich heritage of these city forests as cultural landscapes, and shows that cities and forests can be mutually beneficial. Essential reading for students and researchers interested in urban sustainability and urban forestry, this book also has much wider appeal. For with city forests playing an increasingly important role in local government sustainability programs, it provides an important reference for those involved in urban planning and decision making, public affairs and administration, and even public health. From providers of livelihoods to healthy recreational environments, and from places of inspiration and learning to a source of conflict, the book presents examples of city forests from around the world. These cases clearly illustrate how the social and cultural development of towns and forests has often gone hand in hand. They also reveal how better understanding of city forests as distinct cultural and social phenomena can help to strengthen synergies both between cities and forests, and between urban society and nature.

Screen Ecologies Jul 19 2021 How new media and visual artists provide alternative ways for understanding and visualizing the entanglements of media and the environment in the Asia-Pacific. Images of environmental disaster and degradation have become part of our everyday media diet. This visual culture focusing on environmental deterioration represents a wider recognition of the political, economic, and cultural forces that are responsible for our ongoing environmental crisis. And yet efforts to raise awareness about environmental issues through digital and visual media are riddled with irony, because the resource extraction, manufacturing, transportation, and waste associated with digital devices contribute to environmental damage and climate change. Screen Ecologies examines the relationship of media, art, and climate change in the Asia-Pacific region—a key site of both environmental degradation and the production and consumption of climate-aware screen art and media. Screen Ecologies shows how new media and visual artists provide alternative ways for understanding the entanglements of media and the environment in the Asia-Pacific. It investigates such topics as artists' exploration of alternative ways to represent the environment; regional stories of media innovation and climate change; the tensions between amateur and professional art; the emergence of biennials, triennials, and new arts organizations; the theme of water in regional art; new models for networked collaboration; and social media's move from private to public realms. A generous selection of illustrations shows a range of artist's projects.

**Bioethics and the Humanities** Jun 05 2020 Critiquing many areas of medical practice and research whilst making constructive suggestions about medical education, this book extends the scope of medical ethics beyond sole concern with regulation. Illustrating some humanistic ways of understanding patients, this volume explores the connections between medical ethics, healthcare and subjects, such as philosophy, literature, creative writing and medical history and how they can affect the attitudes of doctors towards patients and the perceptions of medicine, health and disease which have become part of contemporary culture. The authors examine a range of ideas in medical practice and research, including: the idea that patient status or the doctor/patient relationship can be understood via quantitative scales the illusion fostered by medical ethics that doctors, unlike those in other professions, are uniquely beneficent and indeed altruistic. An excellent text for undergraduate and postgraduate students of law, medical ethics and medical healthcare law, *Bioethics and the Humanities* shows the real ethical achievements, problems and half-truths of contemporary medicine.

Re-imagining the Art School Nov 10 2020 This book proposes 'paragogic' methods to re-imagine the art academy. While art schooling was revolutionised in the early 20th century by the Bauhaus, the author argues that many art schools are unwittingly recycling the same modernist pedagogical fashions. Stagnating in such traditions, today's art schools are blind to recent advances in the scholarship of teaching and learning. As discipline-based education research in art eternally battles the perceived threat of epistemicide, transformative educational practices are rapidly overcoming the perennialism of the art school. The author develops critical case studies of open source and peer-to-peer methods for re-imagining the art academy (para-academia) and andragogy (paragogy). This innovative book will be of interest and value to students and scholars of the art school, as well as how the art academy can be reimagined and rebuilt.

**Art-Centered Learning Across the Curriculum** Mar 27 2022 This handbook provides teachers with a framework for implementing inquiry-based, substantive art integration across the curriculum, along with the background knowledge of models needed to do this. Drawing on ideas from Harvard Project Zero, the authors make a clear and compelling argument for how contemporary art supports student learning. The text features subject-specific chapters co-written by teaching scholars from that discipline. Each chapter includes examples of contemporary art with explanations of how these works explore the fundamental concepts of the academic discipline. The book concludes with a chapter on an integrated, inquiry-based curriculum inspired by contemporary art, including guidelines for developing art projects teachers can adapt to their students' interests and needs. This resource is appropriate for art teachers, as well as subject-area teachers who are not familiar with using contemporary art in the classroom.

**Art and Public History** Jan 01 2020 *Art and Public History: Approaches, Opportunities, and Challenges* provides public history practitioners and academics with useful guidance on how art can be integrated into public history initiatives, through critical discussion of tools, strategies, and technologies that contribute to collaboration and engagement across a variety of platforms.

**Critical Issues in Public Art** Feb 11 2021 In this groundbreaking anthology, twenty-two artists, architects, historians, critics, curators, and philosophers explore the role of public art in creating a national identity, contending that each work can only be understood by analyzing the context in which it is commissioned, built, and received. They emphasize the historical continuum between traditional works such as Mount Rushmore, the Washington Monument, and the New York Public Library lions, in addition to contemporary memorials such as the Vietnam Veterans Memorial and the Names Project AIDS Quilt. They discuss the influence of patronage on form and content, isolate the factors that precipitate controversy, and show how public art overtly and covertly conveys civic values and national culture. Complete with an updated introduction, *Critical Issues in Public Art* shows how monuments, murals, memorials, and sculptures in public places are complex cultural achievements that must speak to increasingly diverse groups.

**The Art of Zentangle** Jul 31 2022 Presents an introduction to the "doodling" art form, describing the basic tools and materials and providing step-by-step instructions on how to use repetitive patterns in imaginative ways to create unusual art pieces.

**The Routledge Companion to Art and Activism in the Twenty-First Century** May 17 2021 *The Routledge Companion to Art and Activism in the Twenty-First Century* brings together a wide range of geographical, cultural, historical, and conceptual perspectives in a single volume of new essays that facilitate a deeper understanding of the field of art activism as it stands today and as it looks towards the future. The book is a resource for multiple fields, including art activism, socially engaged art, and contemporary art, that represent the depth and breadth of contemporary activist art worldwide. Contributors highlight predominant lines of inquiry, uncover challenges faced by scholars and practitioners of activist art, and facilitate dialogue that might lead to new directions for research and practice. The editors hope that the volume will incite further conversation and collaboration among the various participants, practitioners, and researchers concerned with the relationship between art and activism. The audience includes scholars and professors of modern and contemporary art, students in both graduate and upper-level undergraduate programs, as well as artists, curators, and museum professionals. Each chapter can stand on its own, making the companion a flexible resource for students and educators working in art history, museum studies, community practice/socially engaged art, political science, sociology, and ethnic and cultural studies.

The Routledge International Handbook of Learning with Technology in Early Childhood Oct 10 2020 *The Routledge International Handbook of Learning with Technology in Early Childhood* focuses specifically on the most cutting-edge, innovative and international approaches in the study of children's use of and learning with digital technologies. This edited volume is a comprehensive survey of methods in children's technologies and contains a rich repertoire of studies from diverse fields and research, including both educational and developmental psychology, post-humanist literacy, applied linguistics, language and phenomenology and narrative approaches. For ease of reference, the Handbook's 28 chapters are divided into four thematic sections: introduction and opening reflections; studies answering ontological questions, which theorize how children take on original identities in becoming literate with technologies; studies answering epistemological questions, which focus on how children's knowledge and learning are (co)constructed with a diverse range of technologies; studies answering practice-related questions, which explore the resources and conditions that create the most powerful learning opportunities for children. Expertly edited, this interdisciplinary and international compendium is an ideal introduction to such a diverse, multi-faceted field.

**Making Smart Cities More Playable** Dec 12 2020 This book explores the ways in which the broad range of technologies that make up the smart city infrastructure can be harnessed to incorporate more playfulness into the day-to-day activities that

take place within smart cities, making them not only more efficient but also more enjoyable for the people who live and work within their confines. The book addresses various topics that will be of interest to playable cities stakeholders, including the human–computer interaction and game designer communities, computer scientists researching sensor and actuator technology in public spaces, urban designers, and (hopefully) urban policymakers. This is a follow-up to another book on Playable Cities edited by Anton Nijholt and published in 2017 in the same book series, Gaming Media and Social Effects.
