The Reading of Theoretical Texts Sep 28 2019 Since the structuralist debates of the 1970s the field of textual analysis has largely remained the preserve of literary theorists. Social scientists, while accepting that observation is theory laden have tended to take the meaning of texts as given and to explain differences of interpretation either in terms of ignorance or bias. In this important contribution to methodological debate, Peter Ekegren uses developments within literary criticism, philosophy and critical theory to reclaim this study for the social sciences and to illuminate the ways in which different readings of a single text are created and defended.

Real Words Mar 03 2020 There exists a very particular grasp of the relation between language and objectivity in the work of G.W.F. Hegel (1770-1831), one that rejects the idea of truth as the reflection between words and what they represent. Jeffrey Reid's *Real Words* is an examination of Hegel's notion of scientific language (i.e. the language of his system) and its implications to a type of discourse that is itself true objectivity. Hegel sees scientific logos as real, actual, and true, where there is no distance between signifier and signified and where the word is the effective thing. The words of Hegel's system are meant to be objective: they 'take place' in the world; they are not the arbitrary constructions of the individual philosopher. This concept of language is only possible through the idea of content, real words that actually embody the truth of nature, history, law, art and philosophy itself. *Real Words* presents an original way of understanding one of the most important philosophers in the Western tradition.

Orality, Identity, and Resistance in Palenque (Colombia) Jan 31 2020 Located near Cartagena de Indias, Colombia, Palenque is a former Afro-Hispanic maroon community that has recently attracted much national and international attention. The authors of this collection examine Palenque's linguistic, geographic, and cultural origins from interdisciplinary and theoretically diverse perspectives. Extensive in situ fieldwork and long-term familiarity with the Palenquero community form the basis of the seven essays, all of which are enriched by data from archival and other scholarly works. In this book, linguists, literary scholars, historians, and specialists in cultural and visual studies thereby enter into mutually enriching dialogues about the origins and nature of Palenque's unique Lengua (local creole) and culture. This rich tapestry of ideas is decidedly international, as its authors are members of academic institutions in the United States, Europe, and Latin

America. *Orality, Identity, and Resistance in Palenque (Colombia)* is an updated translation of Palenque, Colombia: Oralidad, identidad y resistencia, 2012.

Miracles Revisited May 05 2020 Since David Hume, the interpretation of miracle stories has been dominated in the West by the binary distinction of fact vs. fiction. The form-critical method added another restriction to the interpretation of miracles by neglecting the context of its macrotexts. Last but not least the hermeneutics of demythologizing was interested in the self-understanding of individuals and not in political perspectives. The book revisits miracle stories with regard to these dimensions: 1. It demands to connect the interpretation of Miracle Stories to concepts of reality. 2. It criticizes the restrictions of the form critical method. 3. It emphasizes the political implications of Miracle Stories and their interpretations. Even the latest research accepts this modern opposition of fact and fiction as self-evident. This book will examine critically these concepts of reality with interpretations of miracles. The book will address how concepts of reality, always complex, came to expression in stories of miraculous healings and their reception in medicine, art, literature, theology and philosophy, from classic antiquity to the Middle Ages. Only through such bygone concepts, contemporary interpretations of ancient healings can gain plausibility.

The Handbook of Communication History Mar 15 2021 The Handbook of Communication History addresses central ideas, social practices, and media of communication as they have developed across time, cultures, and world geographical regions. It attends to both the varieties of communication in world history and the historical investigation of those forms in communication and media studies. The Handbook editors view communication as encompassing patterns, processes, and performances of social interaction, symbolic production, material exchange, institutional formation, social praxis, and discourse. As such, the history of communication cuts across social, cultural, intellectual, political, technological, institutional, and economic history. The volume examines the history of communication history; the history of ideas of communication; the history of communication media; and the history of the field of communication. Readers will explore the history of the object under consideration (relevant practices, media, and ideas), review its manifestations in different regions and cultures (comparative dimensions), and orient toward current thinking and historical research on the topic (current state of the field). As a whole, the volume gathers disparate strands of communication history into one volume, offering an accessible and panoramic view of the development of communication over time and geographical places, and providing a catalyst to further work in communication history.

Civic Learning through Agricultural Improvement Nov 30 2019 How do people use education to respond to change? How do people learn what is expected of “good citizens” in their communities? These questions have long concerned educational historians, civic educators, and social scientists. In recent years, they have captured national attention through high-profile education reform proposals and civic initiatives. The historian who reviews the relevant literature, however, will discover something odd: most of it focuses on schooling, despite the fact that, prior to the middle of the twentieth century, formal schooling played only a small (but significant) part in most people’s lives. What other educational forces and institutions bring civic ideals to bear upon minds and hearts? This question is rarely raised. At issue is a conceptual problem: we, today, tend to equate “education” with “schooling.” Do county fairs and farmers’ associations have anything to do with civic education? Drawing insights from debates at the time of the “founding” of the history of education as a branch of modern scholarship, this author asserts that they do. Using the life of county fairs, farmers’ associations, and farmers’ institutes as its central thread, this book explores how prominent town-dwellers and leading farmers tried to use agricultural improvement to grow towns and to shape civic sensibilities in the rural Midwest. Promoting economic development was the foremost concern, but the efforts taught farmers much about their “place” as “good citizens” of industrializing communities. As such, this study yields insights into how rural people of the nineteenth century came to accept the ideal that “town” and “country” were interdependent parts of the same community. In doing so, it reminds educators and historians that much education and learning – particularly of the civic sort – takes place beyond the schoolhouse.

American History Revised Mar 27 2022 We tend to think of history as settled, set in stone, but *American History Revised* reveals a past that is filled with ironies, surprises, and misconceptions. Living abroad for twelve years gave author Seymour Morris Jr. the opportunity to view his country as an outsider and compelled him to examine American history from a fresh perspective. As Morris colorfully illustrates through the 200 historical vignettes that make up this book, much of our nation’s past is quite different—and far more remarkable—than we thought. We discover that: • In the 1950s Ford was approached by two Japanese companies begging for a joint venture. Ford declined their offers, calling them makers of “tin cars.” The two companies were Toyota and Nissan. • Eleanor Roosevelt and most women’s groups opposed the Equal Rights Amendment forbidding gender discrimination. • The two generals who ended the Civil War weren’t Grant and Lee. • The #1 bestselling American book of all time was written in one day. • The Dutch made a bad investment buying Manhattan for \$24. • Two young girls aimed someday to become First Lady—and succeeded. • Three times, a private financier saved the United States from bankruptcy. Organized into ten thematic chapters, *American History Revised* plumbs American history’s numerous inconsistencies, twists, and turns to make it come alive again.

The Modern Idea of History and its Value Jul 07 2020 This is an original and accessible introduction to the modern idea of history and its value, and an indispensable companion to the study of history and its philosophical underpinnings. The book answers two basic questions: What is history? And what is its value? It also shows how the answers to these questions are mutually dependent. The old view that history is the teacher of life, for instance, assumes that the past is a reservoir of examples from which moral lessons for the present can be drawn. The subjects discussed include history as the teacher of life, the need for truth and objectivity, the moral standards of the historian, realism and the value of historical insight, historical explanation and understanding, the intelligibility of the historical process, the tragedy of history, the politics of history-writing, and the close connection between history, narrative, and the desire for justice. These topics are discussed with the help of inspiring and influential historians and philosophers such as Thucydides, Ranke, Hegel, Nietzsche, Collingwood, Arendt, White, Hunt, and Ankersmit.

Islam: A Brief Look at Faith and History (Revised Edition) Apr 27 2022 EPUB eBook version: Islam has influenced and continues to influence many cultures around the globe. It is shaping history, cultures and civilizations. Sadly, most of us only receive a two-dimensional look at Islam—a view that is often distorted by the brevity of the media sound-bites or by opinionated agendas. Our intention with this book is to present Islam, its teachings and the history of those who follow it. It is not a comprehensive study—nor should it be seen as definitive. Rather, it should be used as a stimulus for further detailed study. We hope and pray that this effort becomes a source of promoting (much needed) harmony, peace, tolerance, and coexistence in the human family. This can be done through school education systems, interfaith sessions, mosque open houses, educational seminars and individual readership. This new Revised Edition has larger text, clearer graphics and many new additions to the previous text.

Reinventing Free Labor Jan 13 2021 One of the most infamous villains in North America during the Progressive Era was the padrone, a mafia-like immigrant boss who allegedly enslaved his compatriots and kept them uncivilized, unmanly, and unfree. In this history of the padrone, first published in 2000, Gunther Peck analyzes the figure's deep cultural resonance by examining the lives of three padrones and the workers they imported to North America. He argues that the padrones were not primitive men but rather thoroughly modern entrepreneurs who used corporations, the labour contract, and the right to quit to create far-flung coercive networks. Drawing on Greek, Spanish, and Italian language sources, Peck analyzes how immigrant workers emancipated themselves using the tools of padrone power to their own advantage.

The Order of the Ages Nov 10 2020 In *The Order of the Ages*, Robert Bolton explains the principles that relate the modern world to earlier ages, and the position of our own era in a universal time-cycle, revealing the essential nature of time. He shows that time imposes patterns of its own on the order of events, which reveal themselves by numerical regularities. By means of a Platonic view of creation--which connects temporal with non-temporal realities--we come to see how man's inner life holds the balance between these two kinds of objective reality. Connections are made between metaphysical ideas of time and the scientific idea of entropy, along with its varied applications. The last two thousand years are analyzed numerically in terms of traditional cosmology, making possible the calculation of our present position in a universal era, together with the time within which this era will come to an end. Finally, there is a review of the possibility that this ending may coincide with what Christian tradition calls the Last Times, and what the implications of this would be for current values and religious beliefs. "Christian Platonism has a long and distinguished history, but few orthodox Catholics have tried to make a serious contribution to this tradition in recent times. Robert Bolton's extraordinary book is just such an achievement. Influenced by René Guénon's *The Reign of Quantity and the Signs of the Times*, and respectful of Tradition, this is a work of great creativity as well as metaphysical intelligence."--STRATFORD CALDECOTT, author of *The Radiance of Being* "Time, like beauty, is one of the foremost mysteries of human experience. Here Robert Bolton has made a deliberate and courageous effort to confront the nature of time. It is like a breath of fresh air to see such care taken to present what can authentically be called the traditional view. 'Recurrence' and 'Never Again' are the poles of this mystery, so well and ably covered in this book. Essential reading for the serious seeker."--KEITH CRITCHLOW, author of *The Hidden Geometry of Flowers* "How, when, and why did the world begin? And how will it end? Or is there no ending or beginning? What part does mind play in creation? Are we and the universe programmed toward a certain end? All that can honestly be given in response to such questions is an introduction to that constant and recurrent world-view which this book uniquely provides."--JOHN MICHELL, author of *The Dimensions of Paradise*

At the Edge of the Forest Apr 03 2020 Inspired by David Chandler's groundbreaking work on Cambodian attempts to find order in the aftermath of turmoil, these essays explore Cambodian history using a rich variety of sources that cast light on Khmer perceptions of violence, wildness, and order, examining the "forest" and cultured space, and the fraught "edge" where they meet.

Character and Causation Sep 08 2020 In the first ever book-length treatment of David Hume's philosophy of action, Constantine Sandis brings together seemingly disparate aspects of Hume's work to present an understanding of human action that is much richer than previously assumed. Sandis showcases Hume's interconnected views on action and its causes by situating them within a wider vision of our human understanding of personal identity, causation, freedom, historical explanation, and morality. In so doing, he also relates key aspects of the emerging picture to contemporary concerns within the philosophy of action and moral psychology, including debates between Humeans and anti-Humeans about both 'motivating' and 'normative' reasons. **Character and Causation** takes the form of a series of essays which collectively argue that Hume's overall project proceeds by way of a soft conceptual revisionism that emerges from his Copy Principle. This involves recalibrating our philosophical ideas of all that agency involves to fit a scheme that more readily matches the range of impressions that human beings actually have. On such a reading, once we rid ourselves of a certain kind of metaphysical ambition we are left with a perfectly adequate account of how it is that people can act in character, freely, and for good reasons. The resulting picture is one that both unifies Hume's practical and theoretical philosophy and radically transforms contemporary philosophy of action for the better.

A Biblical History of Israel Nov 22 2021 In this much-anticipated textbook, three respected biblical scholars have written a history of ancient Israel that takes the biblical text seriously as an historical document. While also considering nonbiblical sources and being attentive to what disciplines like archaeology, anthropology, and sociology suggest about the past, the authors do so within the context and paradigm of the Old Testament canon, which is held as the primary document for reconstructing Israel's history. In Part One, the authors set the volume in context and review past and current scholarly debate about learning Israel's history, negating arguments against using the Bible as the central source. In Part Two, they seek to retell the history itself with an eye to all the factors explored in Part One.

Emergentist Marxism Aug 08 2020 In tackling emergentist Marxism in depth, this well-written volume demonstrates that critical realism and materialist dialectics are indispensable to theorizing the functioning of complex social and physical systems. Author Sean Creaven investigates Marx's dialectics of being and consciousness, forces and relations of production, base and superstructure, class structure and class conflict, and demonstrates how they allow the social analyst to conceptualize geo-history as embodying a tendential evolutionary directionality, rather than as simply random or indeterminate in terms of its outcomes. For those interested in social and political theory, Marxism and communism and contemporary social theory, this outstanding volume is an important read and a valuable resource.

Apocalyptic and the Future of Theology Feb 11 2021 Ernst Kasemann famously claimed that apocalyptic is the mother of Christian theology. J. Louis Martyn's radical interpretation of the overarching significance of apocalyptic in Paul's theology has pushed Kasemann's claim further and deeper. Still, despite the recognition that apocalyptic is at the core of New Testament and Pauline theology, modern theology has often dismissed, domesticated, or demythologized early Christian apocalyptic. A renewed interest in taking apocalyptic seriously is one of the most exciting developments in recent theology. The essays in this volume, taking their point of departure from the work of Martyn (and Kasemann), wrestle critically with the promise (and possible peril) of the apocalyptic transformation of Christian theology. With original contributions from established scholars (including Beverly Gaventa, Stanley Hauerwas, Robert Jenson, Walter Lowe, Joseph Mangina, Christopher Morse, and Fleming Rutledge) as well as younger voices, this volume makes a substantial contribution to the discussion of apocalyptic and theology today. A unique feature of the book is a personal reflection on Ernst Kasemann by J. Louis Martyn himself.

Hometown Hamburg May 17 2021 Through the study of Hamburg handicraft in the late Weimar Republic "Hometown Hamburg" addresses three intertwined problems in modern German history: the role of institutionalized social, political and cultural continuity versus contingency in the course of modern German development; the impact of conflicting notions of social order on the survival of liberal democracy; and the role of corporate politics in the rise of National Socialism. It provides a theoretical and analytical framework for reintroducing the notion of historical continuity in the study of modern German history. The book also supports the recent challenges to the notion of Hamburg as a liberal economic and political bastion, a "London on the Elbe," in a nation of conservative and authoritarian governmental regimes. **Hometown Hamburg** demonstrates why "liberal" and "socialist" Hamburg also remained a hotbed of corporate radicalism and underscores the fact that National Socialism was the only political party that presented a coherent vision of a corporate "good society," thereby making it attractive to hometown voters across the entire social spectrum in Hamburg (and in Germany).

Nation and the Writing of History in China and Britain, 1880–1930 Jul 19 2021 **Nation and the Writing of History in China and Britain** explores, through a comparative approach, the reception of the nationalist worldview and its effects on the practice of history in China and Britain. This book proposes that nationalism, rather than a political doctrine, is a way of making sense of the world

which results from the combination of a set of definite assumptions. The work analyzes how each one of these premises was accepted and negotiated by literati, intellectuals, historians, and other scholars in the late nineteenth and early twentieth centuries. The results of this research showcase how the reception of the new nationalist worldview crucially affected images of the past, the present, and the future in both societies and decisively framed cultural, social, and political debate. In addition, they likewise evidence the fundamental role that historical narratives play in the crystallization of national identities. This book is perfect for readers interested in China and Britain during this time period, but also to anyone attracted to new ways of conceiving nationalism and its role in our world.
