Magnetic Recording Apr 08 2021 "The first magnetic recording device was demonstrated and patented by the Danish inventor Valdemar Poulsen in 1898. Poulsen made a magnetic recording of his voice on a length of piano wire. MAGNETIC RECORDING traces the development of the watershed products and the technical breakthroughs in magnetic recording that took place during the century from Paulsen's experiment to today's ubiquitous audio, video, and data recording technologies including tape recorders, video cassette recorders, and computer hard drives. An international author team brings a unique perspective, drawn from professional experience, to the history of magnetic recording applications. Their key insights shed light on how magnetic recording triumphed over all competing technologies and revolutionized the music, radio, television and computer industries. They also show how these developments offer opportunities for applications in the future. MAGNETIC RECORDING features 116 illustrations, including 92 photographs of historic magnetic recording machines and their inventors." Sponsored by: IEEE Magnetics Society

How to Restore Your Motorcycle, Second Edition May 09 2021

Musical Creativity in Restoration England Oct 26 2022 Musical Creativity in Restoration England is the first comprehensive investigation of approaches to creating music in late

seventeenth-century England. Understanding creativity during this period is particularly challenging because many of our basic assumptions about composition – such as concepts of originality, inspiration and genius – were not yet fully developed. In adopting a new methodology that takes into account the historical contexts in which sources were produced, Rebecca Herissone challenges current assumptions about compositional processes and offers new interpretations of the relationships between notation, performance, improvisation and musical memory. She uncovers a creative culture that was predominantly communal, and reveals several distinct approaches to composition, determined not by individuals, but by the practical function of the music. Herissone's new and original interpretations pose a fundamental challenge to our preconceptions about what it meant to be a composer in the seventeenth century and raise broader questions about the interpretation of early modern notation.

The Indomitable Florence Finch Jan 05 2021 “An American hero...finally gets her due in this riveting narrative. You will absolutely love Florence Finch: her grit, her compassion, her fight. This isn't just history; she is a woman for our times.” –KEITH O'BRIEN, the New York Times bestselling author of *Fly Girls* The riveting story of an unsung World War II hero who saved countless American lives in the Philippines. When Florence Finch died at the age of 101, few of her Ithaca, NY neighbors knew that this unassuming Filipina native was a Presidential Medal of Freedom recipient, whose courage and sacrifice were unsurpassed in the Pacific War against Japan. Long accustomed to keeping her secrets close in service of the Allies, she waited fifty years to reveal the story of those dramatic and harrowing days to her own children. Florence was an unlikely warrior. She relied on her own intelligence and fortitude to survive on her own from the age of seven, facing bigotry as a mixed-race mestiza with the dual heritage of her American serviceman father and Filipina mother. As the war drew ever closer to the Philippines, Florence fell in love with a dashing American naval intelligence agent, Charles "Bing" Smith. In the wake of Bing's sudden death in battle, Florence transformed from a mild-mannered young wife into a fervent resistance fighter. She conceived a bold plan to divert tons of precious fuel from the Japanese army, which was then sold on the black market to provide desperately needed medicine and food for hundreds of American POWs. In constant peril of arrest and execution, Florence fought to save others, even as the Japanese police closed in. With a wealth of original sources including taped interviews, personal journals, and unpublished memoirs, *The Indomitable Florence Finch* unfolds against the Bataan Death March, the fall of Corregidor, and the daily struggle to survive a brutal occupying force. Award-winning military historian and former Congressman Robert J. Mrazek brings to light this

long-hidden American patriot. The Indomitable Florence Finch is the story of the transcendent bravery of a woman who belongs in America's pantheon of war heroes.

Teaching Information Fluency Sep 01 2020 Teaching Information Fluency describes the skills and dispositions of information fluency adept searchers. Readers will receive in-depth information on what it takes to locate, evaluate, and ethically use digital information. The book realistically examines the abilities of Internet searchers today in terms of their efficiency and effectiveness in finding online information, evaluating it and using it ethically. Since the majority of people develop

these skills on their own, rather than being taught, the strategies they invent may suffice for simple searches, but for more complex tasks, such as those required by academic and professional work, the average person's performance is adequate only about 50% of the time. The book is laid out in five parts: an introduction to the problem and how search engine improvements are not sufficient to be of real help, speculative searching, investigative searching, ethical use and applications of information fluency. The intent of the book is to provide readers ways to improve their performance as consumers of digital information and to help teachers devise useful ways to integrate information fluency instruction into their teaching, since deliberate instruction is needed to develop fluency. Since it is unlikely that dedicated class time will be available for such instruction, the approach taken embeds information fluency activities into classroom instruction in language arts, history and science. Numerous model lessons and resources are woven into the fabric of the text, including think-alouds, individual and group search challenges, discussions, assessments and curation, all targeted to Common Core State Standards as well as information fluency competencies.
