*Gender from Latin to Romance Oct 01 2019* This book explores grammatical gender in the Romance languages and dialects and its evolution from Latin. Michele Loporcaro investigates the significant diversity found in the Romance varieties in this regard; he draws on data from the Middle Ages to the present from all the Romance languages and dialects, discussing examples from Romanian to Portuguese and crucially also focusing on less widely-studied varieties such as Sursilvan, Neapolitan, and Asturian. The investigation first reveals that several varieties display more complex systems than the binary masculine/feminine contrast familiar from modern French or Italian. Moreover, it emerges that traditional accounts, whereby neuter gender was lost in the spoken Latin of the late Empire, cannot be correct: instead, the neuter gender underwent a range of different transformations from Late Latin onwards, which are responsible for the different systems that can be observed today across the Romance languages. The volume provides a detailed description of many of these systems, which in turn reveals a wealth of fascinating data, such as varieties where 'husbands' are feminine and others where 'wives' are masculine; dialects in which nouns overtly mark gender, but only in certain syntactic contexts; and one Romance variety (Asturian) in which it appears that grammatical gender has split into two concurrent systems. The volume will appeal to linguists from a range of backgrounds, including Romance linguistics, historical linguistics, typology, and morphosyntax, and is also of relevance to those working in sociology, gender studies, and psychology.

The International Baccalaureate Diploma Programme Jul 10 2020 The International Baccalaureate (IB) is a respected qualification gaining increasing currency around the world, and which has been adopted by a wide variety of schools, both public and private. In the UK, growing dissatisfaction with the A-level system has led to an intense debate about alternative qualifications, and in many schools IB courses have been introduced alongside conventional A-level courses. This practical introduction to the IB takes a balanced look at the pros and cons and features a wealth of advice from those actually involved in teaching and implementing it in schools. Providing comparative material on how IB courses differ from A-levels and a subject-by-subject account of best practice in teaching the IB, this book offers a rich source of practical advice for teachers, school leaders or managers involved in teaching or implementing the IB programmes.

AS and A Level Geography Through Diagrams Nov 25 2021 DT These highly successful revision guides have been brought right up-to-date for the new A Level specifications introduced in September 2000. DT Oxford Revision Guides are highly effective for both individual revision and classroom summary work. The unique visual format makes the key concepts and processes, and the links between them, easier to memorize. DT Students will save valuable revision time by using these notes instead of condensing their own. DT In fact, many students are choosing to buy their own copies so that they can colour code or highlight them as they might do with their own revision notes.

*Tunnel of Love* Jan 04 2020 Pregnant, recently widowed, and hoping for transformation, a young woman moves to Los Angeles with her teenage stepdaughter Linda has known only a few worthwhile men, and the good ones have a nasty habit of dying young. While teaching at the Newark branch of the Fred Astaire Dance Studio she meets Wright, who has a Mustang and a thirteen-year-old daughter, Robin. Soon enough Linda and Wright are married and pregnant, but just six weeks after the wedding he drops dead, leaving Linda with little besides the car and the girl. Unsure what else to do, Linda packs Robin into the Mustang and sets off for Los Angeles, toward a promise of a new and better life. Robin is surly, cynical, and addicted to junk food—in short, a typical teenager. But as Linda's pregnancy progresses and they try to make their way in the City of Angels, this unlikely pair will forge an unexpected emotional connection. Hilma Wolitzer's storytelling recalls the best work of Anne Tyler and Gail Godwin, and her wit shines through in this tale of improbable allegiances and contained grief. This ebook features an illustrated biography of Hilma Wolitzer, including rare photos and never-before-seen documents from the author's personal collection.

*Skills and Techniques for Geography A-Level* Aug 23 2021 E.P.I.C.S. is a series of topic books which will prove ideal for students of A-Level Geography. The series brings a fresh approach to topics of current interest.

Europe moves East May 08 2020 In May 2004, the fifth enlargement of the European Union saw the accession of eight Central and Eastern European states (the 'A8' countries of the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovakia and Slovenia), with Cyprus and Malta joining at the same time. This was the largest expansion in the EU's history, adding ten member states and 75 million people. In January 2007, the accession of Bulgaria and Romania (the 'A2' countries) added a further 30 million people. The Committee's report examines the impact on UK business of the accession of the 'A8' and 'A2' countries, following on from two previous inquiries ("Industrial and Trade Relations with Central Europe", HCP 893, session 1997-98, (ISBN 9780105550785); and "Industrial and Trade Relations with the Baltic States", HCP 835, session 1999-2000 (ISBN 9780102524000)). The Committee's report concludes that the EU accession of these countries has been beneficial to the UK economy and business, chiefly through the plugging of gaps in the UK labour market as well as through increased opportunities for exports and investment. However, these benefits could be greater if businesses were better informed about the resulting opportunities, and the Government should consider what it can do to reduce the 'fear factor' of investing outside UK businesses' comfort zones, particularly in the new member states which are accessible to small and medium-sized companies. The Committee also highlights the importance of improving the skills base of the domestic workforce if UK business wishes to remain globally competitive.

Past & Present Mar 06 2020

*Advanced Geography* Jul 22 2021 Written to meet the requirements of the new geography A-Level syllabuses, this volume explains difficult theories and concepts, and examines key issues and controversies. It includes case studies and over 1000 sample questions.

study/revision guides have been fully updated to meet the latest specification changes. Written by experienced examiners, they contain in-depth coverage of the key information plus hints, tips and guidance about how to achieve top grades in the A2 exams.

*Encyclopedia of Geography* May 20 2021 Simply stated, geography studies the locations of things and the explanations that underlie spatial distributions. Profound forces at work throughout the world have made geographical knowledge increasingly important for understanding numerous human dilemmas and our capacities to address them. With more than 1,200 entries, the *Encyclopedia of Geography* reflects how the growth of geography has propelled a demand for intermediaries between the abstract language of academia and the ordinary language of everyday life. The six volumes of this encyclopedia encapsulate a diverse array of topics to offer a comprehensive and useful summary of the state of the discipline in the early 21st century. **Key Features** Gives a concise historical sketch of geography's long, rich, and fascinating history, including human geography, physical geography, and GIS Provides succinct summaries of trends such as globalization, environmental destruction, new geospatial technologies, and cyberspace Decomposes geography into the six broad subject areas: physical geography; human geography; nature and society; methods, models, and GIS; history of geography; and geographer biographies, geographic organizations, and important social movements Provides hundreds of color illustrations and images that lend depth and realism to the text Includes a special map section **Key Themes** Physical Geography Human Geography Nature and Society Methods, Models, and GIS People, Organizations, and Movements History of Geography This encyclopedia strategically reflects the enormous diversity of the discipline, the multiple meanings of space itself, and the diverse views of geographers. It brings together the diversity of geographical knowledge, making it an invaluable resource for any academic library.

*Mediterranean Ecogeography* Sep 11 2020 A core textbook series that aims to provide students with accessible, up-to-date accounts of Ecogeography - the marriage of ecology with geography - in the primary terrestrial and marine environments. This is the first book in the series on *Mediterranean Ecogeography*. Biological diversity in the Mediterranean Basin is amongst the highest of any region on earth, both in terms of total species numbers and endemism. The flora is estimated at about 25,000 species of flowering plants and ferns, compared with about 6000 species in non-Mediterranean Europe. About 50% of these are endemic. Diversity amongst vertebrate animals is also high, though endemism rates are lower than for plants. The high levels of diversity contribute to, and are a reflection of, the considerable variability of landscape. This results from a combination of factors including geological and tectonic history, relief and physiography, climate, geomorphological processes, hydrology, soils, the incidence of fires and impact of human activities. The landscapes of the Mediterranean Basin are thus varied and fragmented; a mosaic of ecosystems and communities. *Mediterranean Ecogeography* aims to examine and explain this heterogeneity, and the approach is focused on the ecogeography of the region. Analysing the factors which account for the present distributions of plants and animals, and the functioning of ecosystems within the Mediterranean Basin can help in the understanding of the relationship between people and natural ecosystems. A key to the conservation of these ecosystems is the wise use of resources, biological and physical. In addition, it is vital to assess how the natural environments of the region will respond to further change. In the last twenty years, understanding of the functioning of mediterranean-type ecosystems has advanced through several international projects. This book draws upon the findings of these, and other research in the Mediterranean Basin, to present a comprehensive text on a key region of the world, and the problems and prospects of its environmental exploitation.

*Subject Index to Periodicals* Apr 18 2021

*AS/A2 Geography Contemporary Case Studies: Climate Change* Jan 28 2022 *Contemporary Case Studies* feature up-to-date case studies on key topics in AS and A2 Geography. Written by highly experienced authors, examiners and teachers, each title opens with an introductory framework that identifies the relevant key concepts and then follows with a series of short cases that include succinct analysis of the issues raised. In the *Using case studies* boxes, specific questions are posed and examiner guidance is provided on how the material can be used to tackle them; exercises based on one or more of the case studies are also included. The concluding section provides more detailed advice on making the most of the case studies in the examination.

*Teaching at Post-16* Mar 18 2021 The post-16 sector is the focus of great change in education and this book provides all teaching professionals with a guide to exploring and developing successful teaching in this new environment. With contributions from education experts and

subject specialists, this book addresses the issues that now face teachers at post-16. It guides readers through the new requirements in a simple and accessible way; looks at teaching and learning issues in detail and considers the professional development of those teaching at this level. Essential reading for all post-16 teachers in schools and colleges.

A2 Geography for AQA Specification A Aug 03 2022 Written for the AQA geography specification A, this text develops skills analysis in context through the use of map extracts and satellite data. It incorporates ICT and questions to reinforce learning. Sample exam questions and mark schemes give pupils practice.

The British National Bibliography Feb 03 2020

Psychology Feb 14 2021 Revise AS AQA Psychology gives complete study support throughout the year. This Study Guide matches the curriculum content and provides in-depth course coverage plus invaluable advice on how to get the best results in the A2 exam.

The Battle Over America's Origin Story Dec 15 2020 This book examines the legends of who 'really' discovered America. It argues that histories of America's origins were always based less on empirical evidence and more on social, political, and cultural wish fulfillment. Influenced by a complex interplay of Nativist hatred of immigrants and Aboriginal people, as well as distrust of academic scholarship, these legends ebbed and flowed with changing conditions in wider American society. The book focuses on the actions of a collection of quirky, obsessed amateur investigators who spent their lives trying to prove their various theories by promoting Welsh princes, Vikings, Chinese admirals, Neo-lithic Europeans, African explorers, and others who they say arrived centuries before Columbus. These myths acted as mitigating agencies for those who embraced them. Along with recent scholarship, this book makes extensive use of archival materials -- some of which have never been employed before. It covers the period from the sixteenth century to the present. It brings together separate historiographic ideas to create a unified history rather than focusing on one particular legend as most books on the subject do. It shows how questions of who discovered America helped create the field of historical scholarship in this country. This book does not attempt to prove who discovered America, rather it tells the story of those who think they did. Brian Regal is Associate Professor of history at Kean University, USA.
