R. Edward Freeman's *Strategic Management: A Stakeholder Approach*, this work assembles a collection of contributions by the most influential and widely cited scholars working in the area of stakeholder scholarship today. The analyses collected here comment on the impact Freeman's book - and stakeholder theory more generally - has had upon the fields of management and organizational ethics. This study also includes original responses from Freeman himself. As the conversation about stakeholders hits its academic and popular stride, this timely volume provides both a retrospective of stakeholder theory's history as well as a guide to the questions that are likely to emerge during the next quarter century, providing a new foundation for future theory and practice. This volume will be an indispensable resource for any serious scholar working in the area of stakeholder theory. Additionally, because the language of managing stakeholder relationships is

becoming increasingly popular, practicing executives and NGO members will find this an exceptional and informative reference.

Business, Innovation and Responsibility Jan 01 2020 Responsible Innovation. For some, this expression is only an oxymoron or, worse, a means of masking with a sheet of virtue economic practices that would otherwise appear selfish and self-interested. For others, theorists and actors of innovation, this expression represents a formidable lever of action and a rich conceptual source from which to draw new ways of innovating. The articulation between different levels of norms - economic and ethical, to which we can add the legal dimension - is not new, and is the subject of an in-depth reflection, decades old,

around the idea of Corporate Social Responsibility (CSR). By taking up some debates on CSR, most of which are foreign to the current authors of responsible innovation, this book examines the various justifications that CSR brings in order to convince economic players, subject to powerful market forces, of their responsible commitment. But these are not enough. The book also explores the specific contribution of the concept of responsible innovation to coping with the technological, social and political breakthroughs generated by innovation, and is based on philosophical resources such as the ethics of virtue and the ethics of "care".

Entrepreneurship in Africa

Aug 08 2020 It is now widely recognized that in regions like Africa, for economic and other reasons, the public sector has had to disengage and divest from many areas of the economy and allow private enterprise, especially scalable start-ups and new ventures, to enter and flourish if economic development and employment are to grow. There is, however, a training and education gap since entrepreneurship is rarely taught formally at African universities and, when it is, it is often approached from a Western perspective which may not be appropriate given that African environments are significantly different from most Western ones in terms of economic infrastructure and political considerations. This book allows readers to understand the African entrepreneurial

context by guiding them through the principal stages in the life of a new venture, and offers approaches, both Western and indigenous, that can inform their entrepreneurial actions. It concludes by examining some specialized topics, including female, youth, and social entrepreneurship, as well as real estate and technology. Exercises throughout the book will enable readers to evaluate their motivations and preparedness for entrepreneurship and learn how to communicate a new venture's key features to potential stakeholders. By focusing on the distinctive features of entrepreneurship in the African context, and taking a conversational tone, this is an informative and practical text that will be useful for students of Global Entrepreneurship and Business as well as actual and prospective entrepreneurs in the private, non-profit, and public sectors.

Collinson Oct 02 2022 "We have continued to evolve the structure and content of this textbook in step with the rapidly changing world of international business. This includes completely revising several key chapters, including Chapter 6, on International Trade. This is entirely updated and includes new case studies covering both the trade-war between the US and China and the complex Brexit process. These and other real-world developments have made a wide range of stakeholders much more aware of the significance of global trade interdependencies than in the past. Chapter 16 on the European Union is also entirely updated to take account of

Brexit and a range of new socio-political and economic events in Europe. Chapter 11 ('MNEs as Responsible Stakeholders') has been removed, making this edition more consolidated, with 20 rather than 21 chapters. In place of Chapter 11 we have inserted new sections, frameworks and case studies on responsible business throughout the book as a fundamental dimension of international business theory and practice across all the other chapters. New case studies, such as 'Businesses and NGOs working together on climate change' in Chapter 4, provide additional material on this topic. Chapter 14, on 'Political risk and negotiation strategy' also features new case studies on the 'US-Venezuela oil dispute' and 'Huawei accused of spying'--

This brief offering, created to fit the needs of a one-semester course, is part of the established Berenson/Levine series.
