Oral Antidiabetics Nov 03 2020 Diabetes continues to spread worldwide. Traditionally diabetes in adults has not been considered a serious life-threatening disease. This attitude needs to be changed, however, since the complications associated with the adult form of diabetes affect almost every organ system. The high morbidity and mortality of Non-Insulin-Dependent Diabetes Mellitus (NIDDM) suggest that current treatment strategies are unsatisfactory, pointing to an urgent need for new therapeutic approaches. This volume provides a comprehensive description and evaluation of recently obtained and previously unpublished data written by leading experts in the field, together with a discussion of antidiabetics under development and new approaches for the management of type 2 diabetes.

Social Practices and Dynamic Non-Humans Mar 07 2021 The robots are coming! So too is the 'age of automation', the march of 'invasive' species, more intense natural disasters, and a potential cataclysm of other unprecedented events and phenomena of which we do not yet know, and cannot predict. This book is concerned with how to account for these non-humans and their effects within theories of social practice. In particular, this provocative collection tackles contemporary debates about the roles, relations and agencies of constantly changing, disruptive, intelligent or otherwise 'dynamic' non-humans, such as weather, animals and automated devices. In doing so contributors challenge and take forward existing understandings of dynamic non-humans in theories of social practice by reconsidering their potential roles in everyday life. The book will benefit sociology, geography, science and technology studies, and human- (and animal-) computer interaction design scholars seeking to make sense of the complex entanglement of non-human phenomena and things in the performance of social practices.

The Book Book May 29 2020 In "The Book Book" readers will learn how to make book planning, typesetting, layout, and prepress production accessible to and easy for anyone with computer experience.
