Global Capital Markets Jan 27 2022 This topical volume examines key developments in the law regulating
capital markets, drawing on examples from around the world – including United States, Canada, Europe,
China, India, and New Zealand. With perspectives from international scholars, chapters look at current
issues including the regulation of crowdfunding, efforts in Europe for shareholder empowerment, hedge
fund activism in Canada, international regulatory cooperation, and regulation of corporate governance in
China through securities law rules.

Effective Big Data Management and Opportunities for Implementation Oct 12 2020 "Big data" has become a
commonly used term to describe large-scale and complex data sets which are difficult to manage and
analyze using standard data management methodologies. With applications across sectors and fields of
study, the implementation and possible uses of big data are limitless. Effective Big Data Management and
Opportunities for Implementation explores emerging research on the ever-growing field of big data and
facilitates further knowledge development on methods for handling and interpreting large data sets.
Providing multi-disciplinary perspectives fueled by international research, this publication is designed
for use by data analysts, IT professionals, researchers, and graduate-level students interested in
learning about the latest trends and concepts in big data.

Paving the Way for 5G Through the Convergence of Wireless Systems Feb 02 2020 In the ever-evolving
telecommunication industry, smart mobile computing devices have become increasingly affordable and
powerful, leading to significant growth in the number of advanced mobile users and their bandwidth
demands. Due to this increasing need, the next generation of wireless networks needs to enable solutions
to bring together broadband, broadcast, and cellular technologies for global consumers. Paving the Way
for 5G Through the Convergence of Wireless Systems provides innovative insights into wireless networks
and cellular coexisting solutions that aim at paving the way towards 5G. Through examining data
offloading, cellular technologies, and multi-edge computing, it addresses coexistence problems at
different levels (i.e., physical characteristics, open access, technology-neutrality, economic
characteristics, healthcare, education, energy, etc.), influencing networks to provide solutions for next
generation wireless networks. Bridging research and practical solutions, this comprehensive reference
source is ideally designed for graduate-level students, IT professionals and technicians, engineers,
academicians, and researchers.

Big Data Challenges Oct 24 2021 This book brings together an impressive range of academic and
intelligence professional perspectives to interrogate the social, ethical and security upheavals in a
world increasingly driven by data. Written in a clear and accessible style, it offers fresh insights to
the deep reaching implications of Big Data for communication, privacy and organisational decision-making.
It seeks to demystify developments around Big Data before evaluating their current and likely future
implications for areas as diverse as corporate innovation, law enforcement, data science, journalism, and
food security. The contributors call for a rethinking of the legal, ethical and philosophical frameworks

that inform the responsibilities and behaviours of state, corporate, institutional and individual actors in a more networked, data-centric society. In doing so, the book addresses the real world risks, opportunities and potentialities of Big Data.

Clean, Green and Responsible? Aug 02 2022 New Zealand and Australia are broadly considered to be countries in which sustainability and responsibility discourses are being pursued by governments and business alike, and in which incentives and initiatives are helping confront and overcome sustainability-related challenges. This book takes a closer look behind and beyond the marketing mantras of both Australia's and New Zealand's "clean and green" campaigns and, on the basis of representative examples and cases, critically evaluates the status quo. The book assesses the effectiveness of sustainability and responsibility models with a focus on the South Pacific and argues that the ways in which issues have been dealt with in this more closely defined geographical region are most likely a good indicator of how similar issues are (or soon will be) dealt with around the globe. As such, the book offers a rich source of cases on sustainability and responsibility in the business arena, a critical review, and an inspirational affirmation of responsible business practice.

OECD Economic Surveys: Canada 2014 Jan 03 2020 OECD's 2014 Economic Survey of Canada examines recent economic developments, policies and prospects. Special chapters cover housing in Canada and the labour market and skills mismatch.

Analysing China's Soft Power Strategy and Comparative Indian Initiatives Jul 01 2022 A comprehensive analysis of China's efforts to build and utilize soft power as a distinctive part of its foreign policy. This volume examines the evolution and application of China's soft power with particular focus on various strategic initiatives such as cultural and public diplomacy, Confucius institutes, development assistance and infrastructure building, media collaborations and healthcare diplomacy. This is to emphasize cooperation and partnerships while advancing the theory of harmonious development through these initiatives across the world. Employing an alternative perspective, it analyses the strategic benefits and limitations of China's soft power policies, and compares them with similar policies by India for identifying the differences and applications.

Teaching and Learning at a Distance Jun 27 2019 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in-service teachers, and for training programs that discuss teaching distant learners or managing distance education systems. This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs. The teacher or trainer who uses this book will be able to distinguish between appropriate uses of distance education. In this text we take the following themes: The first theme is the definition of distance education. Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing. This definition is based on the work of Desmond Keegan, but is unique to this book. This definition of distance education has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica. The second theme of the book was the importance of research to the development of the contents of the book. The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence. Certainly there are "rules of thumb", but we have always attempted to only include recommendations that can be supported by research. The third theme of Teaching and Learning at a distance is derived from Richard Clark's famous quote published in the Review of Educational Research that states that media are mere vehicles that do not directly influence achievement. Clark's controversial work is discussed in the book, but is also fundamental to the book's advocacy for distance education - in other words, we authors did not make the claim that education delivered at a distance was inherently better than other ways people learn. Distance delivered instruction is not a "magical" approach that makes learners achieve more. The fourth theme of the book is equivalency theory. Here we presented the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment. Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom. The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive - that it should cover as much of the various ways instruction is made available to distant learners as is possible. It should be a single source of information about the field.

The Routledge Handbook of Poverty in the United States Oct 31 2019 In the United States, the causes and even the meanings of poverty are disconnected from the causes and meanings of global poverty. The Routledge Handbook of Poverty in the United States provides an authoritative overview of the relationship of poverty with the rise of neoliberal capitalism in the context of globalization. Reorienting its national economy towards a global logic, US domestic policies have promoted a market-based strategy of economic development and growth as the obvious solution to alleviating poverty, affecting approaches to the problem discursively, politically, economically, culturally and experientially. However, the handbook explores how rather than alleviating poverty, it has instead exacerbated poverty and pre-existing inequalities - privatizing the services of social welfare and educational institutions, transforming the state from a benevolent to a punitive state, and criminalizing poor women, racial and ethnic minorities, and immigrants. Key issues examined by the international selection of leading scholars in this volume include: income distribution, employment, health, hunger, housing and urbanization. With parts focusing on the lived experience of the poor, social justice and human rights frameworks - as opposed to welfare rights models - and the role of helping professions such as social work, health and education, this comprehensive handbook is a vital reference for anyone working with those in poverty, whether directly or

at a macro level.

International Organizations and the Implementation of the Responsibility to Protect Sep 10 2020 This book seeks to understand the obligation of the international community to implement the principles of the Responsibility to Protect (R2P). With a focus on the humanitarian crisis in Syria, the volume examines what formal responsibility and actual capability international institutions have to protect and prevent civilians from systematic mass atrocities and presents an analysis of several prominent international organizations (IOs). Each chapter focuses on a specific organization and explores their formal responsibilities and how these pertain to the obligations of the R2P. Existing capabilities and actual abilities to address the challenges of R2P are analysed by looking at these issues before, during, and after the occurrence of the humanitarian crisis in Syria. With the UN not fully engaged in the Syrian conflict, the systematic human rights abuses have engendered greater attention on other organizations. This volume argues that if the UN Security Council's inactions result in an abdication of responsibilities under the UN Charter, there should not only be a discussion of how the UN must alter its approach, but also an examination of whether there are alternative R2P paths for other MNOs to take in the name of international peace and human security. This book will be of much interest to students of R2P, humanitarian intervention, international organisations, Middle Eastern politics and security studies.

Library and Information Science in the Middle East and North Africa Aug 29 2019 This volume offers up-to-date insights into the state of library and information science (LIS) in the Middle East and North Africa. Covered topics include information literacy, intellectual property, LIS education and research, publishing and more. This timely contribution thus presents vital areas of research on a region that receives relatively little coverage and is currently experiencing rapid and significant changes.

Fundamentals of Gas Shale Reservoirs Sep 30 2019 Provides comprehensive information about the key exploration, development and optimization concepts required for gas shale reservoirs Includes statistics about gas shale resources and countries that have shale gas potential Addresses the challenges that oil and gas industries may confront for gas shale reservoir exploration and development Introduces petrophysical analysis, rock physics, geomechanics and passive seismic methods for gas shale plays Details shale gas environmental issues and challenges, economic consideration for gas shale reservoirs Includes case studies of major producing gas shale formations

Ending Extreme Inequality Nov 24 2021 Poverty and inequality are at record levels. Today, forty-seven million Americans live in poverty, while the median is in decline. The top 20 percent now controls 89 percent of all wealth. These conditions have renewed demands for a new economic Bill of Rights, an idea proposed by F. D. Roosevelt, Truman and Martin Luther King, Jr. The new Economic Bill of Rights has a coherent plan and proclaims that all Americans have the right to a job, a living wage, a decent home, adequate medical care, good education, and adequate protection from economic fears of unemployment, sickness and old age. Integrating the latest economic and social data, Ending Extreme Inequality explores each of these rights. Each chapter includes: an analysis of the social problems surrounding each right; a historical overview of the attempts to right these wrongs; and assessments of current solutions offered by citizens, community groups and politicians. These contemporary, real-life solutions to inequality can inspire students and citizens to become involved and open pathways toward a more just society.

New Horizons for a Data-Driven Economy Feb 25 2022 In this book readers will find technological discussions on the existing and emerging technologies across the different stages of the big data value chain. They will learn about legal aspects of big data, the social impact, and about education needs and requirements. And they will discover the business perspective and how big data technology can be exploited to deliver value within different sectors of the economy. The book is structured in four parts:

Part I "The Big Data Opportunity" explores the value potential of big data with a particular focus on the European context. It also describes the legal, business and social dimensions that need to be addressed, and briefly introduces the European Commission's BIG project. Part II "The Big Data Value Chain" details the complete big data lifecycle from a technical point of view, ranging from data acquisition, analysis, curation and storage, to data usage and exploitation. Next, Part III "Usage and Exploitation of Big Data" illustrates the value creation possibilities of big data applications in various sectors, including industry, healthcare, finance, energy, media and public services. Finally, Part IV "A Roadmap for Big Data Research" identifies and prioritizes the cross-sectorial requirements for big data research, and outlines the most urgent and challenging technological, economic, political and societal issues for big data in Europe. This compendium summarizes more than two years of work performed by a leading group of major European research centers and industries in the context of the BIG project. It brings together research findings, forecasts and estimates related to this challenging technological context that is becoming the major axis of the new digitally transformed business environment.

This practice capsule deals with Paper 1 for classes 1 to 5 3. Covers Previous Years' Questions (2021-2013) of various Teaching Entrances 4. More than 3000 Questions are provided for practice 5. Well detailed answers help to understand the concepts Central Teacher Eligibility Test (CTET) or Teacher Eligibility Test (TET) are the national level teaching entrance exams that recruit eligible candidates as teacher who are willing to make their careers in the stream of teaching at Central or State Government Schools. Prepared under National curriculum pattern, the current edition of "CTET & TETs Previous Years' Solved Papers - Paper 1 for Class 1-5" is a complete practice package for teaching entrances. This book covers all the previous years' questions (2021-2013) providing complete detailed explanations of each question. It has more than 3000 Questions that are asked in various Teaching Entrances that promote self-evaluation by enabling not just practicing and revising concepts but also to keep track of self-progress. Well detailed answers help students to win over doubt and fears associated with exam. Preparation done from this book proves to be highly useful for CTET & TET Paper I in achieving good rank. Drones and the Future of Air Warfare Nov 12 2020 This book examines the evolution of airpower and specifically the growth and proliferation of Remotely Piloted Aircraft (RPAs). While most existing literature examines either the law or ethics of RPAs, and some newer scholarship looks to the battlefield effectiveness (the gains from strikes versus the potential for 'blowback, etc.), this work investigates it from a broader military perspective. It examines the strategy for employment of RPAs across the spectrum of warfare, the potential deterrent value of RPAs in some circumstances, and the resulting ability of RPAs to fundamentally shift the character of when and how wars are fought. The central aim of this book is to evaluate the role of 'drones' in warfare to date, and make basic projections on how states will adopt RPAs andUCAVs in the future. At the core is the goal of answering a broad, underlying research question: How will the RPA innovation impact military strategy and international security? This book will be of much interest to students of airpower, drone warfare, military and strategic studies, security studies and IR.

Climate and Energy Protection in the EU and China Dec 02 2019 This edited volume gives an insight into climate and energy protection in China and the European Union (EU). By taking a closer look at the EU and China separately, the book presents the current situation in terms of environmental policy and energy use/ consumption in EU as well as in China. The book broaches the collaboration of the EU and China regarding climate and energy protection. The target audience primarily comprises research experts in the field of climate research as well as public decision makers.

Creating China's Climate Change Policy Dec 14 2020 Drawing on first hand interview data with experts and government officials, Olivia Gippner develops a new analytical framework to explore the vested interests and policy debates surrounding Chinese climate policy-making.

Lean Combustion Apr 05 2020 Lean Combustion: Technology and Control, Second Edition outlines and explains the latest advances in lean combustion technology and systems. Combustion under sufficiently fuel-lean conditions can have the desirable attributes of high efficiency and low emissions. The book offers readers both the fundamentals and latest developments in how lean burn (broadly defined) can increase fuel economy and decrease emissions, while still achieving desired power output and performance. This volume brings together research and design of lean combustion systems across the technology spectrum in order to explore the state-of-the-art in lean combustion. Readers will learn about advances in the understanding of ultra-lean fuel mixtures and how new types of burners and approaches to managing heat flow can reduce problems often found with lean combustion (such as slow, difficult ignition and frequent flame extinction). This book offers abundant references and examples of real-world applications. New to this edition are significantly revised chapters on IC engines and stability/oscillations, and new case studies and examples. Written by a team of experts, this contributed reference book aims to teach its reader to maximize efficiency and minimize both economic and environmental costs. Presents a comprehensive collection of lean burn technology across potential applications, allowing readers to compare and contrast similarities and differences Provides an extensive update on IC engines including compression ignition (diesel), spark ignition, and homogeneous charge compression ignition (HCCI) Includes an extensive revision to the Stability/Oscillations chapter Includes use of alternative fuels such as biogas and hydrogen for relevant technologies Covers new developments in lean combustion using high levels of pre-heat and heat recirculating burners, as well as the active control of lean combustion

Academic Research Systems May 19 2021 This book is a comprehensive examination system. However, for-profit college students should have approved writing and are habituated on training. It's been a proportion of the constitution that organized authored journals. Its guidelines are the recovering of the microelectronic redundant vacating as an organization concerning reservation of the circumstantial as well as for-profit college journals and research documents. However, this is a new tactic. Many college students are not regular in study and use daily journal and researches. This book is systematically superfluous in State of Somalia College and in African colleges. There were no past studies in primary and high schools for journal and research. For-profit college journals, however, were present, as well as student-building professional academics. You must have those structures daily, if God wills you.

Convergence of Broadband, Broadcast, and Cellular Network Technologies Mar 29 2022 In the ever-evolving telecommunication industry, technological improvements alone are not able to keep up with the significant growth of mobile broadband traffic. As such, new research on communications networks is necessary to keep up with rising demand. Convergence of Broadband, Broadcast, and Cellular Network Technologies addresses the problems of broadband, broadcast, and cellular coexistence, including the increasing number of advanced mobile users and their bandwidth demands. This book will serve as a link between academia and industry, serving students, researchers, and industry professionals.

Democracy and Diversity in Financial Market Regulation Jan 15 2021 Financial markets have become acknowledged as a source of crisis, and discussion of them has shifted from economics, through legal and regulatory studies, to politics. Events from 2008 onwards raise important, cross-disciplinary questions: must financial markets drive states into political and existential crisis, must public finances take over private losses, must citizens endure austerity? This book argues that there is an alternative. If the financial system were less 'connected', contagion within the market would be reduced and crises would become more localised and intermittent, less global and pervasive. The question then becomes how to reduce connectedness within financial markets. This book argues that the democratic direction of financial market policies can deliver this. Politicising financial market policies - taking discussion of these issues out of the sphere of the 'technical' and putting it into the same democratically contested space as, for example, health and welfare policies - would encourage differing policies to emerge in different countries. Diversity of regulatory regimes would result in some business models being attracted to some jurisdictions, others to others. The resulting heterogeneity, when viewed from a global perspective, would be a reversal of recent and current tendencies towards one single/global 'level playing field', within which all financial firms and sectors have become closely connected and across which contagion inevitably reigns. No doubt the democratisation of financial market policy would be opposed by big firms - their interests being served by regulatory convergence - and considered macabre by some financial regulators and central bankers, who are coalescing into an elite community. However, everyone else, Nicholas Dorn argues here, would be better off in a financial world characterised by greater diversity.

UGC NET Paper 1 - 30 Solved Papers (2004 to 2018) Apr 17 2021 30 Solved Papers of UGC NET Paper 1 Exam (2004 - 2018) consists of past years (authentic) solved papers from 2018 Phase II to 2004 Phase II. The solutions have been prepared after a thorough research. The book contains 1700+ questions of 10 Units as prescribed in the UGC syllabus. The detailed solutions are provided immediately after each paper. The book is also useful for SET (JRF & Asst. Professor).

Principles of Economics Volume 2 of 2 Dec 26 2021 This is Volume 2 of 2, covering Chapters 24 - 34 and the appendices. See www.textbookequity.org/principles-of-economics Excerpt: Principles of Economics is designed for a two-semester principles of economics sequence. The text has been developed to meet the scope and sequence of most introductory courses. At the same time, the book includes a number of innovative features designed to enhance student learning. Instructors can also customize the book, adapting it to the approach that works best in their classroom. The pedagogical choices, chapter arrangements, and learning objective fulfillment were developed and vetted with feedback from educators dedicated to the project. They thoroughly read the material and offered critical and detailed commentary. The outcome is a balanced approach to micro and macro economics, to both Keynesian and classical views, and to the theory and application of economics concepts. Current events are treated in a politically-balanced way as well.

Ruling Ideas Jul 29 2019 "Why do some countries governed by moderate neoliberalism while others by a radical one? Looking at Spain and Romania, the book points to the role of local intellectual traditions, the strength of international alternatives, the resources of the local advocates of neoliberalism and their vulnerability to external coercion"--

Social Epidemiology Jun 19 2021 Social epidemiology is the study of how the social world influences -- and in many cases defines -- the fundamental determinants of health. This link was substantiated in the first edition of Social Epidemiology, and the generation of research that followed has fundamentally changed the way we understand epidemiology and public health. This much-awaited second edition elevates the field again, first by codifying the last decade of research, then by extending it to examine how public policies impact health. The new edition includes: ? 11 fully updated chapters, including entries on the links between health and discrimination, income inequality, social networks, and emotion ? Four all-new chapters on the role of policies in shaping health, including how to translate evidence into action with multi-level interventions ? Updated references, detailing the best research over the last two decades The result is a bold, brilliant text that will serve the new world of epidemiology in which scientists both observe health and design interventions to improve it. Social Epidemiology again sets an

intellectual agenda and provides an essential foundation for those interested in social determinants of health around the world.

Public Private Partnerships Jun 07 2020 This book discusses Public-Private Partnerships (PPPs) and their potential to protect and maintain critical infrastructure in a variety of global governmental settings. Critical infrastructure is defined as essential services that underpin and support the backbone of a nation's economy, security, and health. These services include the power used by homes and businesses, drinking water, transportation, stores and shops, and communications. As governmental budgets dwindle, the maintenance of critical infrastructure and the delivery of its related services are often strained. PPPs have the potential to fill the void between government accounting and capital budgeting. This volume provides a survey of PPPs in critical infrastructure, combining theory and case studies to provide a comprehensive view of possible applications. Written by a diverse group of international experts, the chapters detail PPPs across industries such as transportation, social infrastructure, healthcare, emergency services, and water across municipalities from the US to New Zealand to Hong Kong. Chapters discuss objectives and legal requirements associated with PPPs, the potential advantages and limitations of PPPs, and provide guidance as to how to structure a successful PPP for infrastructure investment. This book is of interest to researchers studying public administration, public finance, and infrastructure as well as practitioners and decision makers interested in instituting PPPs in their communities.

International Arctic Petroleum Cooperation Jul 09 2020 The Arctic region contains large amounts of natural resources considered necessary to sustain global economic growth, so it is unsurprising that it is increasingly susceptible to political, economic, environmental, and even military conflicts. This book looks in detail at the preconditions and outlook for international cooperation on the development of Arctic petroleum resources, focusing on Norwegian-Russian cooperation in the Barents Sea towards 2025. The authors provide a cross-disciplinary approach including geopolitical, institutional, technological, corporate and environmental perspectives to analyse the underlying factors that shape the future development of the region. Three future scenarios are developed, exploring various levels of cooperation and development influenced by and resulting from potential political, commercial and environmental circumstances. Through these scenarios, the book improves understanding of the challenges and opportunities for Arctic petroleum resource development and promotes further consideration of the possible outcomes of future cooperation. The book should be of interest to students, scholars and policy-makers working in the areas of Arctic studies, oil and gas studies, energy security, global environmental governance, environmental politics and environmental technology. Liberia Mar 05 2020 This paper describes Liberia's First Review Under the Extended Credit Facility Arrangement and Request for Waiver of Nonobservance of a Performance Criterion and Modification of Performance Criteria. Nonresource real GDP growth, in particular, while still on an upward trend has been revised down for 2013, reflecting the sluggish pace of public investment. Nonresource growth is expected to pick up in the medium term, in line with an expected increase in public investment albeit the investment path is somewhat more moderate than originally planned and provided project execution speeds up.

How Economics Professors Can Stop Failing Us Aug 22 2021 This book provides an eye-opening exposé on economics professors that will surely shock anyone who is not familiar with the topic, and even some of those who are familiar with it. It is critical of the behavior of economics professors, but is not critical of the field of economics itself. In fact, the book argues that it is essential for economics professors to improve in the work they perform, precisely because of the vital importance of their field. Other books that criticize economics professors typically present complex arguments that interest only the most advanced scholars. However, this book is completely different. It is written to be understandable to anyone who has with an interest in economics, regardless of their background. At the same time, the book does include the most relevant scholarly arguments—it just presents them in a manner that allows anyone to understand them. Also unlike other books on economics, *How Economics Professors Can Stop Failing Us* is written in the context of a genuine exposé. As such, it ventures “backstage” behind the “show business” that has dominated the profession, revealing the profession's deep, dark, (and at times rather ugly) secrets. The book is able to do this by having an author who has experienced first-hand, studied, and written on this topic area for over three decades, who has organized training seminars on it, and who has served for over a decade as the Executive Director of the Association for Integrity and Responsible Leadership in Economics. While exposing the profession's shameful problems, the book also offers great hope in providing realistic solutions to them. One of the main solutions it proposes is for economics professors who are now failing us to follow, and learn from, those other professors who are not failing us—who have, instead, admirably upheld the principles of professional ethics and scientific integrity. In this sense, *How Economics Professors Can Stop Failing Us* offers the most hope, and perhaps the only hope, for economics professors to improve, and to play the responsible role that their students,

their employers, and society overall, expects of them.
