Digest of Education Statistics 2012 Dec 14 2020 Digest of Education Statistics 2012 is the 48th in a series of publications initiated in 1962.

Its primary purpose is to provide a compilation of statistical information covering the broad field of American education--from pre-kindergarten through graduate school--drawn from government and private sources, but especially from surveys and other activities led by NCES (National Center for Education Statistics) part of the Institute for Education Sciences (IES). The digest contains data on the number of schools, students, and teachers, as well as statistics on educational attainment, finances, libraries, technology, and international comparisons. Details on population trends, education attitudes, labor force characteristics, and federal aid supplies helpful background for evaluating the education data. This statistical reference could be helpful to parents choosing schools for their children as well as for teachers, librarians, and public administrators as it tracks enrollment, population trends and key areas of studies with student progress. It also tracks the post-secondary/college level detailing

undergraduate tuition and room/board ESTIMATE costs at private nonprofit institutions, private for profit institutions and public institutions. It also tallies the number of postsecondary degrees and provides some gender demographics in this area. The Digest contains seven chapters: All Levels of Education, Elementary and Secondary Education, Postsecondary Education, Federal Programs for Education and Related Activities, Outcomes of Education, International Comparisons of Education, and Libraries and Adult Education. Preceding these chapters is an Introduction that provides a brief overview of current trends in American education, which supplements the tabular materials in chapters 1 through 7. The Digest concludes with three appendixes. The first appendix, Guide to Sources, provides a brief synopsis of the surveys used to generate the Digest tables; the second, Definitions, is included to help readers understand terms used in the Digest; and the third, Index of Table

Numbers, allows readers to quickly locate tables on specific topics. In addition to updating many of the statistics that have appeared in previous years, this edition contains new material, including: Percentage distribution of 6- to 18-year olds, by parent's highest level of educational attainment, household type (either two-parent or single-parent), and child's race/ethnicity (table 12); Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and region (table 44); Number and percentage of public school students participating in programs for English language learners, by state (table 47); Children 3 to 21 years old served under Individuals with Disabilities Education Act, Part B, by age group and race/ethnicity (table 49); Percentage of 3-, 4-, and 5-year-old children enrolled in preprimary programs, by attendance status, level of program, and selected child and family characteristics (table 57); Number and

EMT Oct 24 2021 A cardiac technician takes you to the front lines of emergency medicine—from tragic car accidents to gunshot wounds—in this “fast-moving” memoir (Booklist). This book takes the reader to the front lines of medicine, from a serious automobile accident on a dark country road to a woman in cardiac arrest to a young man with near-fatal gunshot wounds. For these patients and countless others, treatment cannot wait until they are wheeled into a distant emergency room. If lives are to be salvaged, care must begin with the life-saving skills of Emergency Medical Technicians. “I could never work on a rescue squad,” is a statement the author has heard over and over throughout her years of squad service and readily admits it once

described her own feelings. "If I can do it, so can you," is her response to those whose fear and self-doubt hold them back. "Anything is possible." EMT: Beyond the Lights and Sirens is more than a personal account of Pat Ivey's rescue squad experiences. It is a story of courage and hope and letting go of past losses. It is a book for anyone who has ever struggled to go beyond who they are. Step aboard the ambulance. Witness the tender moments amidst tragedy. Experience the joy and the anguish, and share the tears and laughter of volunteer rescue squad personnel who respond around the clock to the cries of others. In this heartwarming and compelling book, Pat Ivey takes the reader beyond the lights and sirens on a journey they will never forget.

Ethnic Minorities, Media and Participation in Hong Kong Nov 12 2020 Second and third generation South and Southeast Asian minorities in Hong Kong, being marginalized from mainstream social and political affairs, have developed an ambivalent sense of belonging to their host society. Unlike their forefathers who first settled in Hong Kong under British colonial rule, these younger generations have spent their formative years in the territory. As such, they have increasingly engaged in the public and political realms of society, partly in response to the territory's rapid political changes. Leung discusses and analyses the complex and diverse engagement of migrant and minority youths in Hong Kong - and their struggle for recognition, while desiring to 'be-long' to a place they call home. Some are joining the calls for democratic changes in the territory. In particular, she argues that much of this struggle can be seen in minorities' involvement in creative sectors of society. While it will be of especial interest to

scholars with an interest in Hong Kong, this book presents a compelling case study for anyone interested in the dynamics of migrant and minority engagement in the creative sector as a strategy for engagement.

From Buddy to Boss, 2nd Ed Mar 05 2020

Professional development and leadership with you in mind A good friend once said about Chase Sargent that he's "a very intelligent man, but he sure does tick people off sometimes." Sargent doesn't disagree. He may have made some people mad, but he wishes he had done it more often to get this point across: "Leadership—in all aspects of life—is sorely lacking." The second edition of *From Buddy to Boss: Effective Fire Service Leadership* reinforces the fact that the fire service is screaming for leaders as men and

women discover that leadership is important to their existence and success. Being a firefighter can be tiring and frustrating, but it can be rewarding. It's not only about the job, "but also about raising kids, managing your life, and trying to be a good person, attached to God, country, family, and friends," says the author. Many leaders today are surrounded by external politics, hidden agendas, fiscal constraints, and manipulative people. Consider these factors when navigating your career. Sargent knows from decades of experience that simply reaching the top of the organizational ladder does not make you a good leader. Before he went into teaching this subject, "It became apparent very quickly that the leadership and human resources training being provided was as scarce as water in a desert and that the fire service was thirsty." This new second edition includes must-read topics on leadership lessons from the War in Iraq, knowing death in the fire service, and providing leadership in large-scale disasters.

This book will change your life.

Neurotrauma Management for the Severely Injured Polytrauma Patient Sep 03 2022

This text addresses many of the questions which occur when medical professionals of various disciplines interact and have different plans and interventions, each with its own valid scientific and/or experience-based rationale: Questions involving tourniquet placement, ideal fluids and volumes for resuscitation, VTE prophylaxis and many other management considerations.

Straightforward decisions in the patient with a single diagnosis often conflict when applied to the neurologically injured polytrauma patients. Neurotrauma Management for the Severely Injured Polytrauma Patient answers as many of these questions as possible based on the current literature, vast experience with severe neurotrauma in the current conflicts in Afghanistan and Iraq, and the experience of trauma experts across the globe as well as proposes areas for future study where answers

are currently less clear.

Emergency Incident Management Systems Aug 10 2020 The second edition was to be written in

order to keep both reader and student current in incident management. This was grounded in the fact that incident management systems are continually developing. These updates are needed to ensure the most recent and relevant information is provided to the reader. While the overall theme of the book will remain the same of the first edition, research and research-based case studies will be used to support the need for utilizing emergency incident management systems. Contemporary research in the use (and non-use) of an incident management system provides clear and convincing evidence of successes and failures in managing emergencies. This research provides areas where first responders have misunderstood the scope and use of an emergency incident management system and what the outcomes were. Contemporary and historical (research-based) case studies in the United States and around the globe have shown the consequences of not using emergency incident management

systems, including some that led to increased suffering and death rates. Research-based case studies from major incidents will be used to show the detrimental effects of not using or misunderstanding these principles. One of the more interesting chapters in the new edition is what incident management is used around the world.

The "People Power" Education Superbook: Book 30. Vocational - Trades - Career Guide 1 (General Knowledge About Technical - Skilled Professions) May 07 2020 This book has basic contact information for the trades and

technical skills including apprenticeship programs and job websites. I cover community colleges and vocational schools in book #2. The trades are really big because they're always there regardless of what high-tech industries come and go. Whenever I go jogging, I always see the plumbing trucks, the electrical trucks, the contractor trucks, the carpet cleaners, window installers, etc. No matter what happens, people always need those basic services. I looked around for an in-depth vocational-trades book. I couldn't find one. Here is my attempt at a good comprehensive vocational trades book. Even in the trades, be very wary about what you decide to go to school for. I've had friends spend a few years taking a certain vocational program like electronic technician or computer tech only to end up not being able to find a job in their field.

Neuropsychologische casuïstiek Apr 05 2020

Dit boek wil een breed inzicht geven in verschillende gebieden van de klinische neuropsychologie bij volwassenen. Het beoogt relevant te zijn voor (klinisch) neuropsychologen, klinisch psychologen, GZ-psychologen, eerstelijnspsychologen en basispsychologen. Het probeert een intensief blikveld te creëren in het onderzoeksterrein waarbinnen de neuropsychologie meandert. er wordt hiervoor in het boek gebruik gemaakt van casuïstiekbeschrijvingen. Het is in de dagelijkse

praktijk juist de casuïstiek die steeds weer opnieuw de aandacht opeist om de 'gewone' en bijzondere neuropsychologische problemen, die zich in het dagelijkse leven kunnen voordoen te verhelderen en oplossingen hiervoor bedenken. **KERNDOEL** Wij willen een boek aanbieden waarbij in de verschillende hoofdstukken uitgegaan wordt van casuïstiek gericht op volwassenen. Het boek moet als een praktisch instrument gebruikt kunnen worden, dit in tegenstelling tot de vele boeken die als een naslagwerk dienen en uiteindelijk meestal langdurig in de kast staat.
