Management and Leadership in Nursing and Health Care Nov 22 2021 Print+CourseSmart

Essential Nursing Care for Children and Young People Jan 31 2020 *Essential Nursing Care for Children and Young People* is the definitive guide for all nursing and healthcare students and professionals caring for children and young people. Designed to meet the 2010 NMC competency standards for pre-registration nurses, the textbook supports you through the process of caring for children and young people with varied needs and conditions across all healthcare settings. A practical, patient-centred approach is taken throughout, with the 'voices' of children, their families and their carers used to tie theoretical knowledge to the real experience of providing care. The inclusion of the latest research and health and social care policies ensures that you are fully in line with the latest clinical practice, whilst the book's activities and exercises allow you to regularly check your understanding and develop confidence during your journey from student to nursing professional. Main features: Course-Focused Approach – pedagogy and content designed specifically for all three years of the child nursing degree programme. Contemporary Content – research note features and policy integrated throughout to give you instant access to the latest evidence-based practice. Illustrated Throughout – this highly accessible text regularly uses pictures and diagrams to highlight key issues. Voices – include authentic experiences of children, young people, parents, carers and professionals to help develop a patient-focused attitude to care. Pertinent A&P – includes coverage of all relevant anatomy and physiology for child and young person nursing courses. Practice Guidelines – provide practical guidance on everyday procedures for your quick reference. Activities and Answers – allow you to check your knowledge and build confidence. Specialist Authors – each chapter is written by leading experts in each area. *Essential Nursing Care for Children and Young People* is the ideal main textbook for all undergraduate child and young person nursing students, as well as professionals wanting to ensure they are using the latest practice. This text is also relevant to any student or professional involved in the health and social care of children and young adults.

Community Health Nursing Nov 10 2020 Preceded by *Community health nursing / Karen Saucier Lundy, Sharyn Janes. 2nd ed. c2009.*

Pharmacology in Nursing May 05 2020 *Pharmacology in Nursing, Australian and New Zealand 3rd Edition* focuses on the use of drugs as medications within the healthcare environment in Australia and New Zealand. This text is a resource for nurses and health professionals in their understanding of drugs and their actions, especially with regard to the responsibilities of nurses in relation to medication administration and patient management. The text introduces medications and medication therapies, and the principles and methods of medication administration, with an emphasis on the implications for nursing care. Specific medication therapy considerations for vulnerable groups are presented to highlight the special concerns for these groups. A review of dosage calculations is also included. The text takes a body systems approach, focusing on the pharmacology of the medications that act on the various body systems and their disorders.

Clinical Cases: Nursing care case studies - Inking Jun 05 2020 Perfect for: • Diploma of Nursing Students. Apply theory to practice with the Clinical Cases textbook series! *Clinical Cases: Nursing Care Studies* is the perfect textbook for nursing students completing their Diploma. This nursing book offers a variety of case studies based on common real-life examples that you are likely to encounter in practice. Written by Margaret Webb and Ellie Kirov, *Nursing Care Studies* focusses on key nursing care topics, including: Vital Signs, Skin Integrity and Wound Care, Community-based Care, General Health Assessment, Medications and Palliative Care. Benefit from the logical structure of this nursing book, where each case study begins with an introduction of the presenting condition and associated symptoms. As the scenario develops, more information is provided, such as the patient's condition, medications, tests and other important factors. Best of all, the conclusion of each case study emphasises patient outcomes and emphasises key points, providing you a great summary to reflect on. Make the most of *Clinical Cases: Nursing Care Studies* by using it in conjunction with *Tabbner's Nursing Care: Theory and Practice, 6th Edition* by Gabby Koutoukidis, Kate Stainton and Jodie Hughson as you progress through your Diploma of Nursing. Used together, these nursing textbooks provide a strong foundation for your knowledge of important themes and issues in nursing care. Support your nursing education by purchasing the other great titles available in the *Clinical Cases* textbook series. Other titles in this series: • *Clinical Cases: Fundamentals of Nursing Case Studies* by Natasha Scully and Damian Wilson. • *Clinical Cases: Medical-Surgical Nursing Case Studies* by Janine Bothe. Other formats: This book is also available as an App via the Apple App Store <https://itunes.apple.com/au/app/clinical-cases-nursing-care/id659030265?mt=8> • Easy-to-understand, logical layout. • 24 case studies covering key topics in nursing care. • Multiple choice questions to test your knowledge throughout the textbook. • Rationales provided for all answers. • References for further reading and research. • Designed as an exam preparation and revision tool.

Nursing Care Plans - E-Book Feb 11 2021 Get everything you need to create and customize effective nursing care plans, now with evidence-based ICNP® diagnoses! Covering the most common medical-surgical nursing diagnoses and clinical problems, *Gulanick & Myers' Nursing Care Plans: Diagnoses, Interventions, and Outcomes, 10th Edition* features more than 200 care plans, each reflecting the latest evidence-based guidelines and national and international treatment protocols. It also features highlighted QSEN competencies and a clear differentiation of nursing and collaborative interventions. New to this edition are ICNP® diagnoses, care plans on LGBTQ health issues and on electrolytes and acid-base balance, and a new Online Care Planner that makes it easier than ever to customize care plans. Written by noted educators Meg Gulanick and Judith L. Myers, this #1 care planning book will help you learn to think like a nurse! 61 patient problem care plans include the most common/important patient problems, providing the building blocks for you to create your own individualized care plans. 164 disorder care plans cover virtually every common medical-surgical condition, organized by body system. Patient problem care plan format includes a definition/explanation of the diagnosis, related factors, defining characteristics, expected outcomes, ongoing assessment, and therapeutic interventions. Disorder care plan format covers synonyms for the disorder (for ease in cross referencing), a definition, common related factors, defining characteristics, expected outcomes, ongoing assessment, and therapeutic interventions for each relevant nursing diagnosis. Prioritized care planning guidance internally organizes care plans from "actual" to "risk" diagnoses, from general to specific interventions, and from independent to collaborative/interprofessional interventions, to help you select the most important, priority interventions for your particular patients. NEW! Updated care plans are now based on the evidence-based, complete, and internationally accepted International Classification of Nursing Practice (ICNP®) nursing diagnoses. NEW! 19 all-new care plans are featured in this edition. NEW! Updated content throughout reflects the most current evidence-based practice and national and international guidelines. NEW! Online Care Planner on the Evolve website allows you to easily generate customized care plans based on the book's content. NEW! Improved focus on core content includes several care plans that have been moved from the book's Evolve website.

Nursing Interventions Classification (NIC) - E-Book Jul 27 2019 Select nursing interventions with the book that standardizes nursing language! *Nursing Interventions Classification (NIC), 7th Edition* provides a research-based clinical tool to help you choose appropriate interventions. It standardizes and defines the knowledge base for nursing practice as it communicates the nature of nursing. More than 550 nursing interventions are described — from general practice to all specialty areas. From an expert author team led by Howard Butcher, this book is an ideal tool for practicing nurses and nursing students, educators seeking to enhance nursing curricula, and nursing administrators seeking to improve patient care. It's the only comprehensive taxonomy of nursing-sensitive interventions available! More than 550 research-based nursing intervention labels are included, along with specific activities used to carry out interventions. Descriptions of each intervention include a definition, a list of activities, a publication facts line, and references. Specialty core interventions are provided for 53 specialties. NEW! 16 NEW interventions are added to this edition, including health coaching, phytotherapy, management of acute pain, and management of chronic pain. UPDATED! 95 interventions have been revised. NEW! Five label name changes are included.

Conceptual Nursing Care Planning Aug 08 2020

Nursing Care of the Pediatric Surgical Patient Jun 17 2021 The book packages all aspects of the pediatric surgical nurse's job into one comprehensive reference, including pre- and post-operative care, minimally invasive surgery, innovative therapies, fetal surgery, pediatric solid organ transplantation, and more. It offers up-to-date information on pediatric surgical nursing and includes many critical pathways and research topics. It is a must-have resource for all healthcare providers involved in the care of the general pediatric surgical patient.

Maternal Child Nursing Care Apr 03 2020

Psychosocial Nursing for General Patient Care Apr 27 2022 Focuses on psychosocial problems faced by nurses in multiple care settings-- home care, nursing homes, residential care, outpatient, psychiatric home care, and the hospital. Evaluates psychosocial responses to the stresses of illness, illness of a family member, hospitalization, or alterations in mental health, and provides clinically relevant interventions. Begins each disorder or condition chapter with an overview of the problem, including a review of the current theories of causation, and proceeds to assessment, collaborative and nursing management, patient and family education information, charting and discharge planning guidelines, and nursing outcomes. Includes chapters on culture and end-of-life care.

Core Curriculum for Neonatal Intensive Care Nursing - E-Book Jan 01 2020 Perfect as a resource in the field or for exam preparation, this authoritative reference from the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN) includes in-depth coverage of the most common neonatal disorders and their management. The concise outline format highlights the essentials of each condition including definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes to help you find important information quickly. This new edition also features an increased focus on evidence-based practice, new CAMTS and AAMS guidelines, new techniques for PICC placement, and changes to the Neonatal Resuscitation Program. All necessary information to prepare for the neonatal intensive care nursing certification examination is included. Concise outline format provides access to important nursing considerations associated with the management of the most common conditions in the neonate. Text provides a collaborative effort between the three most authoritative associations in neonatal intensive care nursing - AWHONN, AACN, and NANN. Information on families, ethics, legal issues, research, case management, and the transition to home acknowledge the full scope of neonatal nursing practice. NEW! CAMTS and AAMS guidelines, techniques for PICC placement, and changes to the Neonatal Resuscitation Program are just a few of the updates that reveal the importance the new edition places on safety practices and procedures. NEW! Updated chapter on Patient Safety includes selected improvement strategies and resources for neonatal nurses to build a patient safety toolkit, discusses TeamSTEPS (Team Strategies and Tools to Enhance Performance and Patient Safety), and recognizes human issues, such as shift work and fatigue. NEW! Increased focus on evidence-based practice for preterm infants, medications, and antepartum-intrapartum complications sets the standard for neonatal nursing practice. NEW! Strategies to promote inclusionary care better reflect nursing care today by focusing on family-centered care, comprehensive perinatal records, health care teams in the NICU, and best practices in the care of the late preterm infant. NEW! Comprehensively revised chapter on Immunology identifies risk factors for infection associated with term and preterm infants, distinguishes clinical symptoms and therapies associated with TORCHES CLAP spectrum infections, and includes prevention strategies for hospital-acquired infections. NEW! Thoroughly updated content and references reflect currency and technologic advances. NEW! Refocused chapter on Developmental Care guides the nurse to use assessment within the context of the environment and situation to initiate interventions in the moment or use patterns of responses for developing plans of care and presents core measures on evaluating developmental care practices in the NICU.

Leadership in Nursing Practice Sep 01 2022 *Leadership in Nursing Practice: Changing the Landscape of Health Care, Third Edition* provides nursing students with the leadership skill-set they will need when entering the field.

Psychiatric Nursing - Binder Ready Jul 07 2020 Covering the field's latest trends and treatments, *Psychiatric Nursing, 8th Edition* provides you with the solid, therapeutic skills you need to deliver safe and effective psychiatric nursing care. This new edition features a unique, three-pronged approach to psychotherapeutic management which emphasizes the nurse's three primary tools: themselves and their relationship with patients, medications, and the environment. Written in a friendly, approachable style, this text clearly defines the nurse's role in caring for individuals with psychiatric disorders like no other book on the market! Unique! A practical, three-pronged approach to psychotherapeutic management includes: 1) the therapeutic nurse-patient relationship, 2) psychopharmacology, and 3) milieu management. Unique! Norm's Notes offer helpful tips from the lead author, Norman Keltner, at the beginning of each chapter, making it easier to understand difficult topics DSM-5 information is integrated throughout the text, along with updated content and NANDA content. Patient and Family Education boxes highlight information that the nurse should provide to patients and families. Nursing care plans highlight the nurse's role in psychiatric care, emphasizing assessment, planning, nursing diagnoses, implementation, and evaluation for specific disorders. Case studies depict psychiatric disorders and show the development of effective nursing care strategies. NEW! Chapter on Models for Working with Psychiatric Patients revised as new chapter on Emotional Focused Model of Behavior. NEW! Update to various chapters within Unit III: Medication: Psychopharmacology, include the latest drugs used for managing psychiatric disorders. NEW! Update to Communicate Professionally chapter includes methods of communication including social media and other current forms of technology. NEW! Update to Variables Affecting The Therapeutic Environment: Violence and Suicide chapter reorganizes how the five-phase assault cycle is presented so it flows better and is easier to comprehend. NEW! Several of the clinical disorders chapters such as the Schizophrenia, Depressive Disorders, and Anxiety Disorders updated with the latest information on treatments and drugs.

Tabbner's Nursing Care Mar 27 2022 A vital member of the health care team, the contemporary enrolled nurse faces increasing challenges and an increasing level of responsibility. Written specifically for Australian and New Zealand enrolled nurse students, this long awaited new edition reflects the changes and challenges in contemporary enrolled nurse practice as well as the additions and modifications that are occurring in nursing curricula. *Tabbner's Nursing Care: Theory and Practice* 5th edition has been written, reviewed and edited by the people who educate the enrolled nurse and continues to provide enrolled nurse students with the most comprehensive resource available.

Child Health Nursing Dec 12 2020 This extensively-updated text is designed to promote excellence in pediatric nursing care, in both acute care settings and in the community. *CHILD HEALTH NURSING, 3/e* focuses on helping students synthesize new knowledge, apply evidence-based findings, collaborate with children, families, and other healthcare professionals, and use clinical reasoning to plan superior care. It views families as integral participants in all care, and recognizes that all children need health promotion and maintenance interventions, wherever they seek care or whatever conditions they are experiencing. This edition uses current NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020 recommendations. Sample nursing care plans help students apply developmental, psychosocial, and physiologic concepts to the care of children with specific conditions. Research, clinical reasoning, and evidence-based practice are emphasized and integrated throughout, and coverage of contemporary topics ranges from genomics to new pharmacological treatment options.

Nursing Care Plans and Documentation Jun 29 2022 Enter the world of nursing care planning with confidence! This informative guide is the perfect way to build your care planning and documentation skills. Practical and easy-to-read material covers each phase of care plan development and record-keeping for both surgical and non-surgical interventions.

Manual of Psychiatric Nursing Care Planning - E-Book Mar 15 2021 A pocket-sized clinical companion, *Manual of Psychiatric Nursing Care Planning, 5th Edition* supplies you with the latest diagnostic information available, including the DSM-5, for accurate assessment and diagnosis of patients. It offers quick and easy access to plans of care for a range of settings including the inpatient unit, home care, or community mental health setting. Expert author Elizabeth Varcariolis, provides a clinically-based focus with the latest guidelines to psychiatric nursing care. Designed to accompany *Foundations of Mental Health Nursing*, this book is a perfect reference for creating care plans and for clinical use. The latest diagnoses, assessment and treatment strategies, and psychotropic drug information keep you up-to-date with the most current information. Care plans containing nursing diagnosis, etiology, assessment findings/diagnostic cues, outcome criteria, long- and short-term goals, and interventions and rationales offer plans of care for a wide range of psychiatric nursing diagnoses. A focus on clinical information furnishes you with information on providing patient care in a range of settings. *Assessment Guides*, including tables, charts, and questionnaires facilitate patient diagnosis and care. A chapter on Major Psychotropic Interventions and Patient and Family Teaching, in addition to the content found in each disorder chapter, helps you better understand the uses and workings of the psychotropic agents. Coverage of major disorders exposes you to a wide range of disorders within psychiatric nursing. NEW! The most recent information in the field, including the DSM-5, supplies you with the latest diagnostic information available for accurate assessment and diagnosis of patients. NEW! 2007 ANA Psychiatric Mental-Health Nursing

Scope and Standards of Practice familiarize you with the current guidelines for the practice of psychiatric nursing. NEW! Updated 2012-2014NANDA-I Nursing Diagnoses present information on the latest nursing diagnoses related to psychiatric nursing. NEW! Updated medications equip you with the latest information on medications used with psychiatric patients.

Lewis's Medical-Surgical Nursing in Canada Sep 08 2020

Nursing Care Plans Jan 25 2022 Designed to help students learn how to create nursing care plans and effectively document care, this practical book focuses on the nursing plans that are most important, ensuring that students learn what they need to know and that they can find the information they need easily without being distracted by irrelevant information. Packed with easy-to-understand information and focused on helping students develop critical reasoning skills, this respected text presents the most likely nursing diagnoses and collaborative problems with step-by-step guidance on nursing actions and rationales for interventions. More than 85 nursing care plans translate theory into clinical practice. This exciting revision includes special risk consideration icons called "Clinical Alert" (derived from the most recent IOM report) that integrate patient-specific considerations into each care plan. Other enhancements include a streamlined format for easier use; new care plans for maternity, pediatric, and mental health nursing.

Comprehensive Neonatal Nursing Care, Sixth Edition Jan 13 2021 Praise for the Fifth Edition: "This book provides a complete look at neonatal healthcare delivery...[It] includes discussions of contemporary topics of interest, such as informatics, genetics, global health, and family-centered care, which are vital to providers caring for neonates today. The case studies and evidence-based practice dialogues provide great opportunities for further reflection. The book is useful to a wide audience in nursing, including undergraduate and graduate nursing students, practicing neonatal and pediatric nurses, and advanced practice nurses who care for neonates." Score: 92, 4 Stars--Doody's Medical Reviews The sixth edition of this acclaimed neonatal nursing text is completely updated to encompass the most current research findings and strategies for providing cost-effective and evidence-based care. It continues to address neonatal care from a physiologic and pathophysiologic perspective, with a major emphasis on nursing management at the bedside and advanced practice level. It examines each neonatal body system and describes evidence-based interventions that assist in understanding the 'why' behind various clinical presentations. Integrative management is threaded throughout the text along with extensive research findings to support practice strategies and rationales for sound clinical decision-making. Case studies, evidence-based practice boxes, QSEN competencies, and online resources help to amplify and reinforce content. New to the Sixth Edition: New technologies including neonatal health care simulation Trauma-Informed Care Substantial revisions to the Neonatal Resuscitation Program Updates in Continuous Quality Improvement Emphasis on neuroprotective factors Emerging global trends Genomics and its relationship to precision health prevention of diseases Maternal-Fetal Units Neonatal Abstinence Syndrome and maternal drug use Leadership and cost management of the NICU Updates on neonatal care protocols and procedures, new treatments, and new trends in family-centered integrative developmental care New palliative care protocols Video clips regarding parental caregiving Parent perspectives on care Podcasts from experts in the field Highlighted callouts for Emergency Alert, Quality and Safety Issues, and Family Concerns Key Features: Complete physiologic and embryologic foundation of each neonatal body system The relevance of various diagnostic tests Integrates quality and safety as per QSEN competencies Case studies, evidence-based practice boxes, parent handouts, and online resources Authored by internationally reputed "mother" of neonatal nursing Parent Voices provide new perspective on neonatal care

Concise Text Book for Pediatric Nursing - E-Book Nov 30 2019 The title is targeted at undergraduates and is designed to help students develop an understanding of the modern approach to child-care, identification, prevention and nursing management of common health problems of neonates and children. Summary for quick review has been incorporated Questions formulated for every chapter for self-evaluation of the related topic Presence of tables in the book. E.g. (Table: General trends in height and weight gain during childhood)

Pediatric Nursing Care Aug 20 2021 This concise guide delivers all the practical information you need to care for children and their families in diverse settings. It clearly explains what to say and what to do for a broad range of challenges you may encounter in clinical practice.

Maternal Child Nursing Care - E-Book Oct 22 2021 Master the essentials of maternity and pediatric nursing with this comprehensive, all-in-one text! Maternal Child Nursing Care, 7th Edition covers the issues and concerns of women during their childbearing years and children during their developing years. It uses a family-centered, problem-solving approach to patient care, with guidelines supported by evidence-based practice. New to this edition is an emphasis on clinical judgment skills and a new chapter on children with integumentary dysfunction. Written by a team of experts led by Shannon E. Perry and Marilyn J. Hockenberry, this book provides the accurate information you need to succeed in the classroom, the clinical setting, and on the Next Generation NCLEX-RN® examination. Focus on the family throughout the text emphasizes the influence of the entire family in health and illness. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Information on victims of sexual abuse as parents and human trafficking helps prepare students to handle these delicate issues. Nursing Alerts highlight critical information that could lead to deteriorating or emergency situations. Guidelines boxes outline nursing procedures in an easy-to-follow format. Evidence-Based Practice boxes include findings from recent clinical studies. Emergency Treatment boxes describe the signs and symptoms of emergency situations and provide step-by-step interventions. Atraumatic Care boxes teach students how to manage pain and provide competent care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, provide resources and guidance, and illustrate nursing care in a variety of settings. Patient Teaching boxes highlight important information nurses need to communicate to patients and families. Cultural Considerations boxes describe beliefs and practices relating to pregnancy, labor and birth, parenting, and women's health. Family-Centered Care boxes draw attention to the needs or concerns of families that students should consider to provide family-centered care.

Nursing Interventions Classification (NIC) Jun 25 2019 Covering the full range of nursing interventions, Nursing Interventions Classification (NIC), 6th Edition provides a research-based clinical tool to help in selecting appropriate interventions. It standardizes and defines the knowledge base for nursing practice while effectively communicating the nature of nursing. More than 550 nursing interventions are provided - including 23 NEW labels. As the only comprehensive taxonomy of nursing-sensitive interventions available, this book is ideal for practicing nurses, nursing students, nursing administrators, and faculty seeking to enhance nursing curricula and improve nursing care. More than 550 research-based nursing intervention labels with nearly 13,000 specific activities Definition, list of activities, publication facts line, and background readings provided for each intervention. NIC Interventions Linked to 2012-2014 NANDA-I Diagnoses promotes clinical decision-making. New! Two-color design provides easy readability. 554 research-based nursing intervention labels with nearly 13,000 specific activities. NEW! 23 additional interventions include: Central Venous Access Device Management, Commendation, Healing Touch, Dementia Management: Wandering, Life Skills Enhancement, Diet Staging: Weight Loss Surgery, Stem Cell Infusion and many more. NEW! 133 revised interventions are provided for 49 specialties, including five new specialty core interventions. NEW! Updated list of estimated time and educational level has been expanded to cover every intervention included in the text.

Leadership and Nursing Care Management - E-Book Feb 23 2022 Uniquely organized around the AONE competencies, this trusted resource gives you an easy-to-understand, in-depth look at today's most prevalent nursing leadership and management topics. Coverage features the most up-to-date, research-based blend of practice and theory related to topics such as: the nursing professional's role in law and ethics, staffing and scheduling, delegation, cultural considerations, care management, human resources, outcomes management, safe work environments, preventing employee injury, and time and stress management. UNIQUE! Chapters divided according to AONE competencies for nurse leaders, managers, and executives. Research Notes in each chapter summarize relevant nursing leadership and management studies and highlight practical applications of research findings. Case Studies at the end of each chapter present real-world leadership and management situations and illustrate how key concepts can be applied to actual practice. Critical Thinking Questions at the end of each chapter present clinical situations followed by critical thinking questions to help you reflect on chapter content, critically analyze the information, and apply it to the situation. NEW! Full-color design makes content more vivid and realistic. NEW! Chapter on Communication and Care Coordination covers these integral topics. NEW! Updates to critical thinking exercises, case studies, research notes, and references offer the most current information. NEW! Updated sections on Current Issues and Trends reflect the latest topics in the field. NEW! Relevant Web Sites boxes provide authoritative resources for additional research.

Maternal Child Nursing Care Oct 02 2022

Maternal Newborn Nursing Care Plans May 29 2022 Explains how to assess, plan, provide, and evaluate care for pregnancy, delivery, recovery, abnormal conditions, and newborn care. Features more than 65 of the most common and high-risk care plans for nursing care using the nursing process approach, this text includes NIC interventions, discussions on collaborative problems, key nursing activities, signs and symptoms, and diagnostic studies. --From publisher description.

Nursing Care Planning Guides Mar 03 2020 This comprehensive reference helps in creating care plans for clients in the medical-surgical, extended care, or home care environments. Covering over 60 individual disorders, these detailed care plans feature a definition/discussion of the disorder, outcome/discharge criteria, nursing and collaborative diagnoses, and more. It can be used as a resource to assist students and practicing nurses in planning individualized care for medical-surgical clients.

Foundations of Nursing - E-Book Sep 28 2019 Part of the popular LPN Threads series, this comprehensive text prepares you for safe and effective nursing practice in today's fast-paced healthcare environment. Covering maternal and neonatal, pediatric, geriatric, mental health, and community nursing, Foundations of Nursing, 6th Edition, includes all of the essential LPN/LVN content you need. Companion CD includes animations and audio clips depicting physiologic processes, physical assessment video clips, an English/Spanish glossary with definitions and audio pronunciations, an anatomy coloring book, and a fluid and electrolytes tutorial. The consistent, logical framework of the nursing process connects specific disorders to patient care. A mathematics review chapter provides a complete review of basic arithmetic skills and practice in drug dosage calculation to ensure safe medication administration. Safety Alert boxes help you implement The Joint Commission's safety guidelines in all settings, with considerations for special populations. Nursing Diagnosis boxes, screened and highlighted in the text, include nursing diagnoses for specific disorders paired with the appropriate nursing interventions. More than 100 skills in a step-by-step format with full-color illustrations present clearly defined nursing actions with rationales for the skills and techniques you'll use in practice. Medication tables are meticulously detailed and provide quick access to action, dosage, precautions, and nursing considerations for commonly used drugs. Nursing Care Plans, presented in a case-study format, emphasize patient goals and outcomes and end with Critical Thinking Questions to develop your clinical decision-making skills. Coordinated Care boxes emphasize parameters for prioritizing tasks, as well as assigning tasks to and supervising unlicensed assistive personnel. Patient Teaching boxes and Family Teaching boxes include post-hospital discharge guidelines and disease prevention instructions with a strong focus on three-way communication among the nurse, patient, and family members. Life Span Considerations for Older Adults boxes provide age-specific information for the care of the aging population, which is often the primary focus of the LPN/LVN nurse. Home Care Considerations boxes discuss the issues facing patients and caregivers in the home health care setting. Health Promotion boxes provide key information on staying healthy and preventing disease, with tips on wellness from Healthy People 2010. Cultural Considerations boxes discuss how to address the health needs of a culturally diverse patient population when planning care. Enhanced focus on the NCLEX® Examination offers end-of-chapter Get Ready for the NCLEX Examination! sections with key points for self-guided study and remediation and an extensive set of review questions for thorough self-assessment. Additional review questions on Evolve provide instant feedback with correct answer and rationale for even more test-taking practice. Evidence-Based Practice boxes summarize the latest research findings and highlight how they apply to LPN/LVN practice. Updated, vibrant full-color design highlights key information and enhances your understanding of important concepts.

Nursing Care of the Pediatric Neurosurgery Patient May 17 2021 Nursing Care of the Pediatric Neurosurgery Patient is a detailed reference for nurses and other health care providers who care for children with neurosurgical problems. The explanations of pathophysiology, anatomy, radiodiagnostic testing, and treatment options for each neurosurgical diagnosis will help to clarify the rationale behind the nursing care. Descriptions of presenting symptoms, history and findings on neurological examination will help nurses understand the neurological disorder and identify problems. Each chapter includes case studies, impact on families, patient and family education, and practice pearls. Staff and student nurses working in clinics, critical care units, pediatric units, operating rooms, post-anesthesia care units, emergency departments, and radiology departments will benefit from the information presented. Although this book is written for nurses, medical students and neurosurgery residents will also find it helpful.

Leadership and Nursing Care Management - E-Book Apr 15 2021 Develop your management and leadership skills. Leadership and Nursing Care Management, 6th Edition maintains its AONE competencies, and features the most up-to-date, evidence-based blend of practice and theory related to the issues that impact nursing management and leadership today. A fresh, conversational writing style provides you with an easy-to-understand, in-depth look at these prevalent issues. Key topics include the nursing professional's role in law and ethics, staffing and scheduling, delegation, cultural considerations, care management, human resources, outcomes management, safe work environments, preventing employee injury, and time and stress management. UNIQUE! Chapters divided according to AONE competencies for nurse leaders, managers, and executives. Research Notes in each chapter summarize relevant nursing leadership and management studies and highlight the practical applications of research findings. Case Studies at the end of each chapter present real-world leadership and management situations and illustrate how key concepts can be applied to actual practice. Critical Thinking Questions at the end of each chapter present clinical situations followed by critical thinking questions that allow you to reflect on chapter content, critically analyze the information, and apply it to the situation. Full-color design and photos makes content more vivid. Updated! Chapter on the Prevention of Workplace Violence emphasizes the AONE, Joint Commission's, and OSHA's leadership regarding ethical issues with disruptive behaviors of incivility, bullying, and other workplace violence. Updated! Chapter on Workplace Diversity includes the latest information on how hospitals and other healthcare facilities address and enhance awareness of diversity. Updated! Chapter on Data Management and Clinical Informatics covers how new technology helps patients be informed, connected, and activated through social networks; and how care providers access information through mobile devices, data dashboards, and virtual learning systems.

Nursing Care Plans & Documentation Dec 24 2021 The Fifth Edition of Nursing Care Plans and Documentation provides nurses with a comprehensive guide to creating care plans and effectively documenting care. This user-friendly resource presents the most likely diagnoses and collaborative problems with step-by-step guidance on nursing action, and rationales for interventions. New chapters cover moral distress in nursing, improving hospitalized patient outcomes, and nursing diagnosis risk for compromised human dignity. The book includes over 70 care plans that translate theory into clinical practice. Online Tutoring powered by Smarthinking--Free online tutoring, powered by Smarthinking, gives students access to expert nursing and allied health science educators whose mission, like yours, is to achieve success. Students can access live tutoring support, critiques of written work, and other valuable tools. **Fundamentals of Nursing Care** Nov 03 2022 Think like a nurse from the very beginning. Fundamentals of Nursing Care, 3rd Edition, DavisPlus Resources, and Davis Edge work together to create an interactive learning experience that teaches students to make the connections each step of the way. The text, written specifically for LPNs/LVNs, provides the comprehensive foundational knowledge they need to understand. DavisPlus equips instructors with the lesson plans, teaching resources, and activities to create an active classroom environment where students can apply what they're learning. Davis Edge online quizzing tracks student progress; assesses their knowledge; and provides real time analytics to identify their weak concepts and topic areas. This additional practice and direction helps students be successful in this course and builds their confidence as they prepare for the NCLEX® exam. Text Fundamentals of Nursing Care Concepts, Connections & Skills, 3rd Edition A student-oriented focus helps LPN/LVN students to master safe and effective nursing care by developing the critical-thinking and problem-solving skills they need to excel in clinical practice. Clear, concise, readable, well organized, and easy to follow, it's the text that prepares new nurses to make the connections. Davis Edge www.DavisEdge.com Davis Edge is the online quizzing program that integrates seamlessly into the classroom to give students the additional practice questions they need to perform well on course and board exams. It provides instructors with the real-time information they need to monitor, track, and assess their class' mastery of the content. Educators will be able to easily identify the areas in which students are struggling, intervene quickly, and provide relevant remediation to ensure that students succeed and improve within following areas: Comprehension and Retention: How well do students understand the content? Participation and Engagement: Are students keeping-up with their reading and assignments? Test-Taking Skills: Are students prepared for NCLEX®-style questions and improving their test-taking skills? An access code inside new printed texts unlocks Davis Edge and DavisPlus resources, including an ebook powered by VitalSource.

Nursing and Informatics for the 21st Century - Embracing a Digital World, 3rd Edition - Book 2 Oct 29 2019 Nursing Education and Digital Health Strategies explores the current state of health and healthcare education, as well as that of nursing informatics education. These topics include technologies-enabled education for all nurses and interprofessional collaborations from a worldwide perspective. The "New" learning for applied critical thinking will include technology, content, skills versus tools, and the use of "smart" systems for care delivery, the role of critical thinking, and uniqueness of nursing care delivery. Further, how these changes are understood as a paradigm shift that needs to be incorporated along with nursing and healthcare education is emphasized. The effects of technology on human behavior are also explored, addressing human-factors interaction, interdependence of human-computer interaction, and other effects of technology on wellbeing. As part of nursing education, learning from clients/patients to better shape and advance nursing education and scholarship are discussed. Academic-clinical practice partnerships for a digital future, how teams are working together (clinician/teacher) for better healthcare delivery and applied knowledge—including joint appointments (exchange of academia and applied expertise), academic-applied human resources, and interprofessional learning/development—are discussed. This book closes by discussing and using case studies to showcase nursing competencies for the next decade, implications for preparing the healthcare workforce for a digital world, faculty readiness, and the interaction with gaming and simulations. Nursing informatics education, including continuing education beyond academia, i.e., informal education, worldwide, as well as global challenges to support digital world capabilities are described. Hands-on Experiential Delivery and learning-based case studies are also included. Nursing and Informatics for the 21st Century - Embracing a Digital World, 3rd Edition is comprised of four books which can be purchased individually: Book 1: Realizing Digital Health - Bold Challenges and Opportunities for Nursing Book 2: Nursing Education and Digital Health Strategies Book 3: Innovation, Technology, and Applied Informatics for Nurses Book 4: Nursing in an Integrated Digital World that Supports People, Systems, and the Planet

NOC and NIC Linkages to NANDA-I and Clinical Conditions - E-Book Oct 10 2020 Based on ongoing research conducted by investigative teams at the University of Iowa, NOC and NIC Linkages to NANDA-I and Clinical Conditions: Supporting Critical Thinking and Quality Care, 3rd Edition is the only book on the market that provides linkages between the three standardized languages recognized by the American Nurses Organization (NOC, NIC, and all of the 2009-2010 NANDA-I approved nursing diagnoses). Its user-friendly, tabular format and real-world case studies make it the perfect tool to help you develop effective care plans for your patients. This edition features a new chapter on clinical decision making, a new chapter on the use of NNN in information systems, more concise intervention listings that identify major and suggested interventions, and approximately 20 new linkages to common, high-cost medical diagnoses. Linkages between the three standardized languages recognized by the American Nurses Organization: NANDA-I, Nursing Interventions Classification (NIC), and Nursing Outcomes Classification (NOC) help you select the most effective care plans for patients and allow institutions to track and quantify nursing care. Tabular format allows you to quickly retrieve information. Case studies with nursing care plans demonstrate the practical, real-life application of linkages. Definitions of all NANDA-I, NOC, and NIC labels provide comprehensive coverage of the standardized languages. Serves as an excellent companion to Nursing Outcomes Classification (NOC), 4th Edition and Nursing Interventions Classification (NIC), 5th Edition. NEW! Added linkages to common medical diagnoses help support clinical reasoning, improve quality, and build the evidence needed to enhance nursing care. - Includes 15-20

high-frequency, high-cost medical diagnoses that are commonly experienced by patients across the life span. - Examples include Congestive Heart Failure, Chronic Obstructive Pulmonary Disease (COPD), Total Joint Replacement, and Asthma. NEW! Treatment of Intervention content makes information easier to locate by listing interventions as Major Interventions and Suggested Interventions. Two NEW chapters discuss the use of linkages for clinical reasoning and quality improvement and the use of NNN in computerized information systems. NEW! Information associated with the risk for nursing diagnosis is contained on a single page for quick and easy reference.

High Dependency Nursing Care Jul 31 2022 Written by a team of nurses experienced in providing, supporting and developing high dependency care, this textbook discusses the practical issues and skills needed for nurses caring for high dependency patients.

Nursing and Informatics for the 21st Century - Embracing a Digital World, 3rd Edition, Book 4 Jul 19 2021 In Nursing in an Integrated Digital World that Supports People, Systems, and the Planet, the leading-edge innovators in digital health applications, global thought leaders, and multinational, cooperative research initiatives are woven together against the backdrop of health equity and policy-setting bodies, such as the United Nations and the World Health Organization. As the authors prepared this book, the world is struggling with the core issues of access to care, access to needed medical equipment and supplies, and access to vaccines. This access theme is reflected throughout the policy and world health chapters with an emphasis on how this COVID-19 pandemic is exposing the fissures, divides, unfairness, and unpreparedness that are in play across our globe. Sustainability and global health policy are linked to the new digital technologies in the chapters that illustrate healthcare delivery modalities that nurse innovators are developing, leading, and using to deliver care to hard-to-reach populations for better population health. A trio of chapters focus on the underlying need for standards to underlie nursing care in order to capture the data needed to enable new science and knowledge discoveries. The authors give particular attention to the cautions, potential for harm, and biases that the artificial intelligence technologies of algorithms and machine learning pose in healthcare. Additionally, they have tapped legal experts to review the legal statutes, government regulations, and civil rights law in place for patients' rights, privacy, and confidentiality, and consents for the United States, the United Kingdom, and the European Union. The book closes with a chapter written by the editors that envisions the near future—the impact that the new digital technologies will have on how care is delivered, expanding care settings into community and home, virtual monitoring, and patient generated data, as well as the numerous ways that nurses' roles and technology skill sets must increase to support the global goals of equal access to healthcare. Nursing and Informatics for the 21st Century – Embracing a Digital World, 3rd Edition is comprised of four books which can be purchased individually: Book 1: Realizing Digital Health – Bold Challenges and Opportunities for Nursing Book 2: Nursing Education and Digital Health Strategies Book 3: Innovation, Technology, and Applied Informatics for Nurses Book 4: Nursing in an Integrated Digital World that Supports People, Systems, and the Planet

Creating Connections Between Nursing Care and the Creative Arts Therapies Sep 20 2021 The primary goal of this text is to promote educational advancement for health care professionals on the topic of how creative arts therapies can assist patients and clients to achieve specific goals or outcomes. More specifically, the book seeks to create a closer connection between nursing care and the creative arts therapies in order to promote professional collaboration and to expand the concept of holistic care. Most of its twenty chapters explore the theoretical and practical implications of the creative arts therapies as illustrated in single and multiple-case studies. The chapters' authors are creative arts therapists, nurses, social workers, therapeutic recreation specialists, and occupational therapists. They describe creative therapeutic approaches involving art, music, creative writing, dance/movement, and drama in various health care settings. This unique book is designed for a wide range of health care professionals, including nursing, the creative arts therapies, psychology, social work, medicine, occupational, recreational, and physical therapies, and others who are interested in learning more about creative treatment approaches and their application to varied care settings.

Impacts of Rationing and Missed Nursing Care: Challenges and Solutions Aug 27 2019 This book reveals how economic restrictions and limited healthcare resources, combined with growing care demands due to advanced technology and more care options, have to a great extent contributed to increased workloads for healthcare professionals and put them under pressure to prioritize their work. This has led to the rationing of care, i.e., to decision-making processes on the allocation of scarce resources, especially human resources, and on which care activities take priority over others; in turn, these processes have led to unfinished or missed care, which has serious implications for quality of care and patient safety. Concerns related to nursing shortages and lean staffing practices have increased the awareness of the problem, as patient outcomes are affected by the quality and quantity of care that they receive and led to intensified scientific inquiry into this phenomenon. This book is written by the members of the Rancare Cost Action group, whose aim is to facilitate discussion about rationing of nursing care based on a cross-national comparative approach with implications for practice and professional development. Four working groups investigated four areas for four years: a) the conceptualization of care rationing and methodological inquiries concerning the investigation of the phenomenon, b) exploration of possible solutions and intervention studies, c) the ethical perspective of care rationing and missed care including patients' rights and possible discrimination, and d) the educational implications, based on an exploration of the level of patient safety training and care rationing, as well as preparing guidelines for managers. The book will be a valuable resource for nurses, allied healthcare professionals, managers, policymakers, researchers, ethical committees, and educators whose goal is to provide better and safer care.
