Life-saving Appliances Jul 30 2019 This publication contains the three most important IMO instruments dealing with life-saving appliances, namely the International Life-Saving Appliance (LSA) Code, the Revised Recommendation on Testing of Life-Saving Appliances and the Code of Practice for the Evaluation, Testing and Acceptance of Prototype Novel Life-Saving Appliances. The International Life-Saving Appliance (LSA) Code was adopted by IMO's Maritime Safety Committee (MSC) at its 66th session (June 1996) by resolution MSC.48(66). It provides international requirements for the life-saving appliances required by chapter III of the 1974 SOLAS Convention, including personal life-saving appliances, such as lifebuoys, lifejackets, immersion suits, anti-exposure suits and thermal protective aids; visual aids, such as parachute flares, hand flares and buoyant smoke signals; survival craft, such as life rafts and lifeboats; rescue boats; launching and embarkation appliances and marine evacuation systems line throwing appliances; and general alarm and public address systems. The Code entered into force on 1 July 1998 and has been amended in accordance with SOLAS Article VIII as follows: 1: by the May 2006 amendments, which were adopted by resolution MSC.207(81) and entered into force on 1 July 2010; 2: by the December 2006 amendments, which were adopted by resolution MSC.218(82) and entered into force on 1 July 2008; and 3: by the 2008 amendments, which were adopted by resolution MSC.272(85) and entered into force on 1 July 2010. The consolidated text of the LSA Code in the present publication incorporates the above three sets of amendments, including the two sets entering into force on 1 July 2010, since they were deemed to have been accepted in accordance with the SOLAS amendment procedures on 1 January 2010, and therefore automatically entered into force on 1 July 2010.
