*A Thread Of Grace* May 17 2021 8 September 1943. Italy has sued for peace with the Allies and 14-year-old Claudette Blum is learning Italian on the run. She and her father are among the thousands of Jewish refugees scrambling over the Alps to where they hope they will be safe at last. What they don't know is that tomorrow Italy will be under German occupation and about to become a vicious battleground between the Nazis, an increasingly confident resistance and the advancing Allies... Set against this dramatic historical backdrop, Mary Doria Russell's new novel recalls - through the lives of a handful of brilliantly-drawn characters: a mercurial Italian resistance leader, a Catholic priest, an Italian rabbi's family, a disillusioned Wehrmacht doctor - the little known conspiracy of ordinary Italians who saved the lives of thousands of Jews during the final, desperate 20 months of the war. Full of drama, warmth, nobility and, for all the darkness, hope, *A THREAD OF GRACE* tells a story of ordinary people caught up in extraordinary times and accomplishing remarkable things. It is a breathtaking achievement.

*Walking to the End of the World* Dec 24 2021 In April 2015, Beth and Eric Jusino, laden with backpacks and nerves, walked out of a cathedral in the historic village of Le Puy, France, down a cobblestone street, and turned west. Seventy-nine days, a thousand miles, two countries, two mountain ranges, and three pairs of shoes later, they reached the Atlantic Ocean. More than two million pilgrims have walked the Way of Saint James, a long-distance hiking trail familiar to most Americans by its Spanish name, the Camino de Santiago. Each pilgrim has their own reason for undertaking the journey. For the Jusinos, it was about taking a break from the relentless pace of modern life and getting away from all their electronic devices. And how hard could it be, Beth reasoned, to walk twelve to fifteen miles a day, especially with the promise of real beds and local wine every night? Simple. It turned out to be harder than she thought. Beth is not an athlete, not into extreme adventures, and, she insists, not a risk-taker. She didn't speak a word of French when she set out, and her Spanish was atrocious. But she can tell a story. In *Walking to the End of the World*, she shares, with wry humor and infectious enthusiasm, the joys and travails of undertaking such a journey. She evocatively describes the terrain and the route's history, her fellow pilgrims, and the villages passed, and the unexpected challenges and charms of the experience. Beth's story is also about the assurance that an outdoor-based, boundary-stretching adventure is accessible to even the most unlikely of us. In her story, readers will feel that they, too, can get off their comfortable couches and do something unexpected and even spectacular. *Walking to the End of the World* is a warm-hearted and engaging story about an average couple going on an adventure together, tracing ancient paths first created in the tenth and eleventh centuries, paths that continue to inspire and reveal surprises to us today in the twenty-first.

*The Pilgrim's Revenge* Feb 23 2022 After a relatively quiet few months, an outbreak of serious headline-grabbing crimes confronts Inspector King and his team of detectives. Their investigations start with people trafficking on a South Devon beach, followed by a spate of armed robberies. The pressure on the team quickly intensifies when the suspected suicide of a man found hanging in Plymbridge Woods is not initially what it seems. King must determine if it was assisted suicide or something more sinister. Another man's body is soon discovered in his car at a boatyard where he worked: it quickly becomes clear

he was drugged and murdered. Is there a link between the deaths of these men and their previous Army service in Iraq? King becomes increasingly concerned that he may be hunting a serial killer who must be stopped before he kills again.

On top of all that he then had to contend with the real Men in Black and the Trans-Galactics, plus MI5, the CIA, Opus Dei, numerous Freemasons and neo-Templars, Knights of the Star Gates, and various incarnate aspects of the Wild Hunt - who had been hiding for years in a certain little Old Peoples' Home in rural Wiltshire. And it had all been caused by two silly women - Jenny Djinn and Lilith Love - who just happened to also be Death Goddesses, and who fell for the same Mobile Librarian in a small Wiltshire town that was named after trolls...

**The Visible Man** Jun 25 2019 A collection of original fiction by Hugo and Nebula award winning SF legend Gardner Dozois. The collection contains legendary science fiction tales *A Special Kind of Morning*, *Chains of the Sea*, the riveting title story, *The Visible Man*, and twelve other Dozois-authored stories. With an introduction by Robert Silverberg. From the Silverberg introduction: I invite your attention to the rhythms of the prose, the balancing of clauses, the use of alliteration, metaphor, and irony, the tough, elegant sinews of the vocabulary. It is a paragraph of splendid construction, a specimen of prose that shows honorable descent from Chaucer and Shakespeare, Pope and Dryden, Defoe and Dickens, the prose of a man who knows what he wants to say and who says it eloquently and effectively. Dozois is known in his fiction for his beautiful evocation of setting and emotional intensity within a truly alien and often austere vision of the future. He is a science fiction master of the first order—a fact fully on display in this outstanding collection. At the publisher's request, this title is sold

without DRM (Digital Rights Management). "Lyric, haunting, heartbreaking—this is science fiction at its best."—George R.R. Martin "My generation of writers has produced relatively few authentic masters. . .Gardner Dozois is one of them."—William Gibson

**Strike a Match 5: Thin Ice** Jul 27 2019 Twenty years after the apocalyptic Blackout, steam-trains and the telegraph have replaced smartphones and satellites, but while some still fear technology, many dream of its return. In France, winter has brought the terrorist insurgency to a frozen stalemate. On the home front, thoughts turn to spring and the dream of a more peaceful future. The Houses of Parliament are finally relocating to a new permanent home in Highcliffe Castle on the British south coast. In the far north of Scotland, a new national gallery is set to open in Thurso, displaying re-discovered paintings looted from Edinburgh just after the Blackout. In Dover, despite the curfews and rationing, pubs, bars, and clubs are thriving, but the re-opening of the cinema is put on hold after all its seats are stolen for firewood. Ten years ago, Henry Mitchell chased the gang known as the Loyal Brigade from the ruins of Sandringham. A decade later, the gang has returned. After his arrest for arms dealing and smuggling, the new leader of the Loyal Brigade has been confined to a prison hulk in Thurso's frozen harbour. Despite being in isolation, he is still able to co-ordinate a wave of arson attacks in the new capital. Having rebranded himself as a cult leader, with each attack comes an apocalyptic warning of greater destruction to come. It is up to Ruth Deering, Anna Riley, and the Serious Crimes Unit to crack the code before more people are hurt. Henry Mitchell knows a direct line can be drawn between the apocalyptic Blackout, the recent attempted coup, and the devastating insurgency in France. Thanks to evidence gathered during the Second Siege of Calais, Mitchell finally knows where the terrorist leadership is based. As he and Isaac

head deep behind enemy lines, they have one chance to end this forever war. For their plan to work, they'll have to do the unthinkable on a mission from which they almost certainly won't return. The fate of the future is decided in Dover, Bournemouth, Thurso, Poland, and beyond...

*Root Of Unity* Dec 12 2020 Book three of the Russell's Attic series – the sequel to *Half Life*. Cas Russell has always used her superpowered mathematical skills to dodge snipers or take down enemies. Oh, yeah, and make as much money as possible on whatever unsavory gigs people will hire her for. But then one of her few friends asks a favor: help him track down a stolen math proof. One that, in the wrong hands, could crumble encryption protocols worldwide and utterly collapse global commerce. Cas is immediately ducking car bombs and men with AKs – this is the type of math people are willing to kill for, and the U.S. government wants it as much as the bad guys do. But all that pales compared to what Cas learns from delving into the proof. Because the more she works on the case, the more she realizes something is very, very wrong . . . with her. For the first time, Cas questions her own bizarre mathematical abilities. How far they reach. How they tie into the pieces of herself that are broken – or missing. How the new proof might knit her brain back together . . . while making her more powerful than she's ever imagined. Desperate to fix her fractured self, Cas dives into the tangled layers of higher mathematics, frantic for numerical power that might not even be possible – and willing to do anything, betray anyone, to get it.

**EBOOK: Assessing Children's Mathematical Knowledge** Apr 15 2021 'this work is highly relevant to the proliferation of accountability measures worldwide' James Scheurich and Douglas Foley In many countries, the lives of teachers and children are increasingly dominated by programmes of national testing of mathematics and other subjects. In England, the majority of the items in such tests have set mathematical tasks in every day situations such as 'shopping'. This requires children to make decisions about whether to use or not their own every day knowledge and experience in their problem-solving. Some children are likely to have a better 'feel for this game' than others. *Assessing Children's Mathematical Knowledge* draws on the analysis of national curriculum test data from more than 600 children of 10-11 and 13-14 years of age, as well as in-depth interviews with 250 of these as they attempt to solve test problems, in order to explore the nature of the difficulties children experience with 'realistic' items. The book shows, by comparing test and interview data, that many children, as a consequence of their confusion over the requirements of 'realistic' test items, fail in tests to demonstrate mathematical knowledge and understanding that they actually possess. The book also explores whether this problem of invalid measurement is equally spread across children from different social backgrounds, and across the sexes. The book will be of interest to academics and teachers studying for advanced degrees in mathematics education, sociology of education and educational assessment.
