Gardens of the Roman World Dec 27 2021 Romans loved their gardens, whether they were the grand gardens of imperial country estates or the small private spaces tucked behind city houses. They treasured gardens both as places for relaxation and as plots to grow ornamental plants as well as fruits and vegetables. The soothing sound of bubbling fountains often added further to the pleasures of life in the garden. Romans constructed gardens in every corner of their empire, from Britain to North Africa and from Portugal to Asia Minor. Long after their empire collapsed, the gardens they had so carefully planted continued to exert influence in the farflung corners of their former world. This book describes the variety of Roman gardens throughout the empire, from the humblest to the most lavish, including such well-known places as Hadrian's Villa in Tivoli and the gardens of Pompeii and Herculaneum. The continued influence of Roman gardens is traced through Arabic, medieval, and Renaissance gardens to the present day. Many of the lavish illustrations were commissioned for this book.

Gardens of Colony and State Apr 06 2020 A rare and long out-of-print treasure of garden literature, *Gardens of Colony and State* returns in a special reprint edition. Widely considered the best reference on garden-making in the colonies and the Republic, the handsome two-volume set is a lasting record of American gardens and gardeners before 1840. The landmark publication traces the development of a uniquely American garden design, exploring early garden literature and its effect on colonial craftsmen, as well as pre-1800 account books of nurseries and seed houses. Also included are fascinating stories of early horticulturists who inspired the establishment and patronage of botanical gardens for research, plant exploration, education, and public enjoyment. An impressive collection of early prints and photographs—of gates and statues, benches and pergolas, landscape designs and views—invites you to stroll through some of America's most exquisite homes and gardens, many of which have long vanished. *Gardens of Colony and State* is an important contribution to the historic horticulture of America, and a collector's item to be enjoyed for many years.

Gardens and Gardeners of the Ancient World Apr 30 2022 From the earliest of times people have sought to grow and nurture plants in a garden area. *Gardens and Gardeners of the Ancient World* traces the beginning of gardening

and garden history, from Ancient Egypt and Mesopotamia, to the Minoans and Mycenaeans, Greeks, Etruscans and Romans, through Byzantine, Islamic and Persian gardens right up to the Middle Ages. It shows how gardens in each period were designed and cultivated. Evidence for garden art and horticulture is gathered from surviving examples of ancient art, literature, archaeology, actual period gardens that have survived the centuries and the wealth of garden myths associated with certain plants. These sources bring ancient gardens and their gardeners back to life, and provide information on which plants were chosen as garden worthy, their setting and the design and appearance of ancient gardens. Deities associated with aspects of gardens and the garden's fertility are featured - everyone wanted a fertile garden. Different forms of public and domestic gardens are explored, and the features that you would find there; whether paths, pools, arbors and arches, seating or decorative sculpture. The ideal garden could be like the Greek groves of the Academy in Athens, a garden so fine that it was comparable with that of the mythical king Alcinoos, the paradise contemplated by the Islamic world, or a personal version of a garden of Eden that Early Christians could create for themselves or in the forecourt of their churches. In general books on garden history cover all periods up to the present, often placing all ancient gardens in one chapter at the beginning. But there is so much of interest to be found in these early millennia. Generously illustrated with 150 images, with plant lists for each period, this is essential reading for everyone interested in garden history and ancient societies.

Recycling in the Garden Jan 28 2022 People are becoming more aware of the environment and their impact on it. Over the past decades we have become an increasingly consumerist based society. From a world in which recycling was common, single use became the norm. This throwaway society is unsustainable. Sustainable gardening results in the creation of an environmentally friendly area in which natural predators thrive and soils are naturally replenished. Discover innovative and simple ways of recycling everything from water to materials in the garden. Practical examples show recycling in action turning unwanted items into useful features such as bottle edging, footpaths made from tyres, garden forks into table lamps, broken pottery to mosaics and tree roots into lush garden stumperies. Recycling, reusing and upcycling in the garden can make a difference helping you save money by using less water, making your own compost, choosing energy efficient equipment and by giving everyday items a totally new function. Instead of a throwaway society, we are increasingly looking at ways of reducing our use of increasingly scarce resources, turning plastic into paths, using solar energy and conserving water. Natural recycling of plant material and sustainable gardening is increasingly popular. This book helps search for creative ideas that can conserve resources, and save you money. Water is no longer cheap, so the book suggests many ways that you can re-use water and get free rainwater. The book helps you with places you may not think of looking for free and cheap material, such as reclamation yards, factories, restaurants and hospitals. Let your imagination run free without needing much skill and without breaking the bank.

Territorial Ambitions and the Gardens of Versailles Sep 04 2022 In seventeenth-century France, land took on new importance for the practice of politics and rituals of court life. In her major new book, Chandra Mukerji highlights the connections between the two seemingly disparate activities of engineering and garden design. She shows how, at Versailles in particular, the royal park showcased French skills in using nature and art to design a distinctively French landscape and create a naturalized political territoriality. She challenges the association of state power with social

and legal structures alone and demonstrates the importance for Louis XIV and his state of a controlled physical site, a demarcated French territory within the wider European geo-political continent.

The Machine in the Garden Jul 22 2021 By examining the difference between pastoral and progressive ideals that characterised early 20th century American culture, the author shows how American thinkers have considered the relationship between technology and culture in their writings.

The Bulletins of Reef Point Gardens Jan 04 2020 During a ten-year period, from 1946 to 1956, the Reef Point Gardens Bulletins were published by Beatrix Farrand from Reef Point, her house and garden in Bar Harbor, Maine. Mrs. Farrand (1872-1959), who was the niece of the novelist Edith Wharton, became one of America's preeminent landscape gardeners. She designed the Italianate gardens at Dumbarton Oaks in Washington, D.C., created gardens at the White House during the administration of President Woodrow Wilson and landscaped the campuses of Princeton and Yale Universities. At Reef Point, she established an extensive horticultural library and an outstanding collection of plants. These Bulletins describe the plantings in her gardens - the roses, the vines, the heathers and the native plants - and how she cultivated them. They are filled with illustrations and represent a distillation of her wide knowledge and experience. The contents of Reef Point were dispersed when Mrs. Farrand felt that the future of the gardens could no longer be guaranteed. The books and papers were sent to the University of California at Berkeley, and the plants transferred to the Thuya and Asticou Azalea Gardens in Northeast Harbor, Maine. These Bulletins remain as the legacy of a great gardener and a remarkable woman.

The Vatican Gardens Aug 11 2020 The inspiration for virtually all of Rome's famous gardens, the Vatican Gardens first flourished during the Middle Ages and have awed visitors ever since. Yet despite their importance to the history of Western gardens and art, no full-length study of the gardens has previously been published. With the release of *The Vatican Gardens* the third in a series co-published with the Vatican that also includes *The Sistine Chapel: A New Vision* and *The Loggia of Raphael: A Vatican Art Treasure* these important gardens have at last received their full due. Covering the period from the thirteenth century through 1930, when the Vatican became a state, *The Vatican Gardens* explores the plants, planters, and architectural structures of the gardens in fascinating detail. Here you will learn about such celebrated gardeners as Michele Mercate, who around 1570 introduced the rarest plants of his time to the Vatican, and the great botanist Johannes Faber. The famous Cortile del Belvedere courtyard, designed by Donato Bramante for Pope Julius II and envisioned as a vast

outdoor room, is brought to vibrant life through word and image. Discussion of the Gardens' symbolic significance, agricultural functions, and upkeep by such gardening popes as Leo XIII as well as of the gardens at Castel Gandolfo, the pope's four-centuries-old summer residence completes this authoritative volume. Illustrated throughout with newly commissioned images and plans as well as historic pictures and diagrams, and featuring research that among much else establishes the Vatican Gardens as the oldest botanical garden in Italy, this original volume belongs in the libraries of landscape gardeners, architects, historians, and visitors to Rome.

Back to the Garden Jul 10 2020 A fifty-year-old cold case involving California royalty comes back to life—with potentially fatal consequences—in this gripping standalone novel from the New York Times bestselling author of the Mary Russell and Sherlock Holmes series. A magnificent house, vast formal gardens, a golden family that shaped California, and a colorful past filled with now-famous artists: the Gardener Estate was a twentieth-century Eden. And now, just as the Estate is preparing to move into a new future, restoration work on some of its art digs up a grim relic of the home's past: a human skull, hidden away for decades. Inspector Raquel Laing has her work cut out for her. Fifty years ago, the Estate's young heir, Rob Gardener, turned his palatial home into a counterculture commune of peace, love, and equality. But that was also a time when serial killers preyed on innocents—monsters like The Highwayman, whose case has just surged back into the public eye. Could the skull belong to one of his victims? To Raquel—a woman who knows all about colorful pasts—the bones clearly seem linked to The Highwayman. But as she dives into the Estate's archives to look for signs of his presence, what she unearths begins to take on a dark reality all of its own. Everything she finds keeps bringing her back to Rob Gardener himself. While he might be a gray-haired recluse now, back then he was a troubled young Vietnam vet whose girlfriend vanished after a midsummer festival at the Estate. But a lot of people seem to have disappeared from the Gardener Estate that summer when the commune mysteriously fell apart: a young woman, her child, and Rob's brother, Fort. The pressure is on, and Raquel needs to solve this case—before The Highwayman slips away, or another Gardener vanishes.

Philosophy in the Garden Mar 18 2021 Why did Marcel Proust have bonsai beside his bed? What was Jane Austen doing, coveting an apricot? How was Friedrich Nietzsche inspired by his 'thought tree'? In *Philosophy in the Garden*, Damon Young explores one of literature's most intimate relationships: authors and their gardens. For some, the garden provided a retreat from workaday labour; for others, solitude's quiet counsel. For all, it played a philosophical role: giving their ideas a new life. *Philosophy in the Garden* reveals the profound thoughts discovered in parks, backyards, and pot-plants. It does not provide tips for mowing overgrown couch grass, or mulching a dry Japanese maple. It is a philosophical companion to the garden's labours and joys.
