Cavern Nov 30 2019 This exciting novel of mysterious disappearances and subterranean terrors pits nuclear experts against a horror even they could not imagine. A secret: Jack Whittaker, master caver, has found an enormous cavern to rival famous Carlsbad Caverns, a place of pristine darkness, astonishing beauty and unpredictable peril. Whittaker needs to keep the cavern a secret until he can get the rights to develop it. But his ex-wife, scientist Cassandra Roberts, has another idea for the cavern, thanks to an ancient footprint found in its depths, near an emerald-like pool of water that has been undisturbed for millennia: has it? Another secret: In another cavern, this one man-made, patiently scoured from a 2,000-foot-deep salt deposit to house radioactive nuclear waste, government employees have started to disappear. Are these mysterious vanishings a conspiracy? Enter T. L. Smith, chief of security for the Department of Energy, a man given to lies and subterfuge and, whenever needed, violence. evolution has produced something marvellous, something unknown to the world, something that should have disappeared with the end of the last Ice Age, a force so dangerous that once all the secrets in Carlsbad are revealed, and all the depths plumbed, more lives and even the great works of man and of nature are at risk.

Cave May 29 2022 Shortlisted for the Tratman Award 2015 To enter caves is to venture beyond the realm of the everyday. From huge vaulted caverns to impassable, water-filled passages; from the karst topography of Guilin in China to the lava tubes of Hawaii; from tiny remote pilgrimage sites to massive tourism enterprises, caves are places of mystery. Dark spaces that remain largely unexplored, caves are astonishing wonders of nature and habitats for exotic flora and fauna. This book investigates the natural and cultural history of caves and considers the roles caves have played in the human imagination and experience of the natural world. It explores the long history of the human fascination with caves, across countries and continents, examining their dual role as spaces of both wonder and fear. It tells the tales of the adventurers who pioneered the science of caves and those of the explorers and cave-divers still searching for new, unmapped routes deep into the earth. This book explores the lure of the subterranean world by examining caving and cave tourism and by looking to the mythology, literature, and art of caves. This lavishly illustrated book will appeal to general readers and experts alike interested in the ecology and use of caves, or the extraordinary artistic responses earth's dark recesses have evoked over the centuries.

Attack Surface Dec 24 2021 Cory Doctorow's *Attack Surface* is a standalone novel set in the world of New York Times bestsellers *Little Brother* and *Homeland*. Most days, Masha Maximov was sure she'd chosen the winning side. In her day job as a counterterrorism wizard for an transnational cybersecurity firm, she made the hacks that allowed repressive regimes to spy on dissidents, and manipulate their every move. The perks were fantastic, and the pay was obscene. Just for fun, and to piss off her masters, Masha sometimes used her mad skills to help those same troublemakers evade detection, if their cause was just. It was a dangerous game and a hell of a rush. But seriously self-destructive. And unsustainable. When her targets were strangers in faraway police states, it was easy to compartmentalize, to ignore the collateral damage of murder, rape, and torture. But when it hits close to home, and the hacks and exploits she's devised are directed at her friends and family—including boy wonder Marcus Yellow, her old crush and archival, and his entourage of naïve idealists—Masha realizes she has to choose. And whatever choice she makes, someone is going to get hurt. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Liverpool - Wondrous Place Nov 03 2022 No other city in the world is as well known or loved for its vibrant and definitive musical history as Liverpool. In 2002, Guinness World Records: British Hit Singles voted Liverpool 'World Capital of Pop', recognising that Liverpool's homegrown talent has produced more number one hit singles per capita than anywhere else in the world. In 2008, Liverpool will celebrate its crown as European Capital of Culture. Paul Du Noyer's acclaimed book takes us on a tour of the rich musical history of his hometown, from the world-famous Cavern Club in Mathew Street, host to the Beatles' debut performance in 1961, to the city's musical future with contemporary bands like The Zutons. Featuring interviews with key figures of the music scene, this book reveals the creative impulse behind Britain's most musical city. Find out why Liverpool is not just a place where music happens. The city is the reason music happens.

The Fondarca Cave and cavities used as a cult place during the Bronze Age in Central Italy Jul 31 2022 Published in *Origeni n. XXXIX/2016*. Rivista annuale del Dipartimento di Scienze dell'Antichità - "Sapienza" Università di Roma | Preistoria e protostoria delle civiltà antiche - Prehistory and protohistory of ancient civilizations | The Fondarca Cave, or Grotta delle Nottole, is a large Karst cave on Mount Nerone, a mountain located in the north of the Italian region of Marche. The need to understand aspects of rituals carried out by the ancient inhabitants of central Italy in natural cavities during the Bronze Age makes this cave particularly significant. Systematic investigations were first carried out in Fondarca between 2001 and 2005. After a break, investigations were resumed in 2013 and are still under way. The Fondarca hypogeum was used for most of the Metal Age, until at least the Late Bronze Age. The hypogeum is related to the Sentino Gorge caves; besides, some of its archaeological elements suggest a connection to the facies of Grotta Nuova, situated along the central Tyrrhenian area. The amazing natural landscape surrounding the cave, its periodical attendance, and the lack of burial and housing facilities seem to suggest that the cave was used as a cult place. This hypothesis is further strengthened by the finding of several fireplaces, food leftovers (probably from collective meals) and objects in bronze and amber, in an environment characterised by water dripping. | With contributions by: Giorgia Agresti, Filippo Bozzo, Giorgio Brocato, Patrizia Costa, Emilia Gallo, Francesco Marano, Azzurra Mascelloni, Federico Moresi, Giancarlo Pastura, Claudia Pelosi, Elena Pizzo, Fabio Rossi, Ulderico Santamaria.

Landscapes and Landforms of England and Wales Mar 03 2020 This book presents the geomorphological diversity of England and Wales. These regions are characterised by an extraordinary range of landforms and landscapes, reflecting both the occurrence of many different rock types and drastic climatic changes over the last few million years, including ice sheet expansion and decay. The book begins by providing the geological and geomorphological context needed in order to understand this diversity in a relatively small area. In turn, it presents nearly thirty case studies on specific landscapes and landforms, all of which are landmarks in the territory discussed. These include the famous coastal cliffs and landslides, granite tors of Dartmoor, formerly glaciated mountains of Snowdonia and the Lake District, karst of Yorkshire, and many others. The geomorphology of London and the Thames is also included. Providing a unique reference guide to the geomorphology of England and Wales, the book is lavishly illustrated with diagrams, colour maps and photos, and written in an easy-to-read style. The contributing authors are distinguished geomorphologists with extensive experience in research, writing and communicating science to the public. The book will not only be of interest to geoscientists, but will also benefit specialists in landscape research, geoconservation, tourism and environmental protection.

The Timeless Cavern Jul 07 2020 Eleven year old Marged Evans is upset when her mother turns off the TV and sends her outside with her brother to explore. She

hears of the myths and legends that surround the cave on the edge of their hill farm. Being so intrigued by the stories she goes back alone the next day and what she finds deep in that cave will change her life forever. Although this is a work of fun and fantasy, it, unlike similar works by others uses a minimum of fantasy enabling the main characters to weave through a variety of historical happenings. Sometimes we forget that seemingly isolated, small communities are touched by many things that take place in the world at large. Mixing the fantasy of time travel to light up reality can make most of history a desirable, knowledge giving adventure. However, the work was written, chiefly for pleasure and to stimulate the imagination. Please enjoy.

Sacred Darkness Jun 17 2021 Caves have been used in various ways across human society but despite the persistence within popular culture of the iconic caveman, deep caves were never used primarily as habitation sites for early humans. Rather, in both ancient and contemporary contexts, caves have served primarily as ritual spaces. In Sacred Darkness, contributors use archaeological evidence as well as ethnographic studies of modern ritual practices to envision the cave as place of spiritual and ideological power and a potent venue for ritual practice. Covering the ritual use of caves in Europe, Asia, Australia, Africa, Mesoamerica, and the US Southwest and Eastern woodlands, this book brings together case studies by prominent scholars whose research spans from the Paleolithic period to the present day. These contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the understanding of both ancient and modern religious beliefs and practices. This state-of-the-art survey of ritual cave use will be one of the most valuable resources for understanding the role of caves in studies of religion, sacred landscape, or cosmology and a must-read for any archaeologist interested in caves.

The Tungville Trove Jun 05 2020 Water obviously had risen high in the cavern from the hurricane and the ensuing rains, but many places on higher levels remained dry and unaffected by the underground river. Large, long spires of rock reached to the ceiling of the cave, others started at the roof and sought the cave's floor. Water seemed to drip from all parts of the cavern. Moving farther into the cave, his men guided him to a high plateau, which was above any previously marked water level. They carefully climbed to the higher level and were immediately confronted with an immense level expanse of perfectly dry sand and rocks. The area was free of the dripping water and spires. Large boulders dotted the top. A perfect place for the treasure! The large stones could be cut from their root entanglements, the rocks rolled back to cover the opening of the cavern and no one would ever find the natural hiding place. The treasure could be picked up at any time, especially if their pirating ran into hard times.

Liverpool Oct 02 2022 Even before it gave us the Beatles, Liverpool produced the first true rock'n'roll star to be born outside America, Billy Fury. There has been a stream of star names ever since - from the Merseybeat time of the Beatles, Cilla Black and the Searchers to Echo and the Bunnymen, Elvis Costello, Frankie Goes To Hollywood, The La's, The Lightning Seeds and Atomic Kitten. Liverpool even rules the dance floor through its very own super-club, Cream.

Caves and Karst of the Upper Midwest, USA Aug 27 2019 This book discusses the karst and pseudokarst of the Upper Midwest, USA, consisting of the states of Minnesota, Wisconsin, Iowa, and Illinois—the first regional synthesis in 40 years. Starting with an overview of the regional geology of what is largely glaciated fluviokarst and paleokarst developed on Paleozoic carbonates, but including other lithologies such as the St. Peter Sandstone and the Ft. Dodge Gypsum, the caves, springs, sinkholes, and karst hydrogeology of each state are described. Special attention is devoted to the region's longest caves: Coldwater Cave, Mystery Cave, and the Minnesota Cave Preserve caves. Application of tools such as data loggers and LIDAR, with new conceptual models such as hypogenic speleogenesis, has been transformative here. Special topics include lead and zinc mining in the Driftless Area, vertebrate and invertebrate cave fauna near the Laurentide ice limit, the impact and policies of nutrient and herbicide intensive modern agriculture on karst, and paleoclimate studies. The discovery, exploration, institutional history of caving organizations, and show caves of the Upper Midwest, from the year 1700 onwards, are brought up to date. The top 10 historical paradigms of cave and karst science in the Midwest are reviewed. Perspectives on paleontology, archeology, and Native American rock art are included.

Almuric and Other Fantasies Sep 28 2019 The creator of Conan looks to the stars in one of fantasy's most enduring science fantasy classics! Robert E. Howard's Almuric is a savage planet of crumbling stone ruins and debased, near-human inhabitants. Into this world comes Esau Cairn, Earthman, swordsman, murderer. Only he can overthrow the terrible devils that enslave Almuric, but to do so he must first defeat the inner demons that forced him to abandon Earth. Filled with vile beasts and thrilling adventure in the tradition of Edgar Rice Burroughs, "Almuric" is one of Howard's few novels, and an excellent yarn from one of America's most distinct literary voices...

Cast in Oblivion Sep 01 2022 POLITICS ARE HELL Kaylin wasn't sent to the West March to start a war. Her mission to bring back nine Barrani might do just that, though. She traveled with a Dragon, and her presence is perceived as an act of aggression in the extremely hostile world of Barrani-Dragon politics. Internal Barrani politics are no less deadly, and Kaylin has managed—barely—to help the rescued Barrani evade both death and captivity at the hands of the Consort. Before the unplanned “visit” to the West March, Kaylin invited the Consort to dinner. For obvious reasons, Kaylin wants to cancel dinner—forever. But the Consort is going to show up at the front door at the agreed-upon time. The fact that she tried to imprison Kaylin's guests doesn't matter at all...to her. A private Barrani Hell, built of Shadow and malice, exists beneath the High Halls. It is the High Court's duty to jail the creature at its heart—even if it means that Barrani victims are locked in the cage with it. The Consort is willing to do almost anything to free the trapped and end their eternal torment. And she needs the help of Kaylin's houseguests—and Kaylin herself. Failure won't be death—it will be Hell. And that's where Kaylin is going.

Kohr Sep 08 2020 Mike Bergmann works for Astral Industries mining guild. He and his ships controller Roxanna head out for a simple mission to identify and classify a planet that was just discovered and to claim it for Astral Industries. As he enters the neutral zone between the Alpha and Bravo sectors, he finds a derelict ship transmitting a mayday. He rescues occupants who are on their way to a similar planet in the same sector of space. The derelict ship is operated by Atwater Mining Guild, one of his competitors. On board the ship are several people that work for the Federation and are looking for another expiation that was last seen on the planet. They combine forces to see if the planet is viable for its resources. Little do any of them know that the planet is already occupied and at war with another race, who are trying to claim the system for its minerals.
