Every Child, Every Day Jul 19 2021 Reform of the educational systems in the United States and all over the world are coming from a wide variety of sources—philanthropists and businesses, federal and state governments, administrators and teachers, both large and small school districts. More nimble school districts have the best chance of creating a revised model of educational delivery that will produce successful students. The national statistics are awful. For every 100 low-income students that enter high school, only 65 will get a high school diploma, 53 will enroll in college, and will 11 actually complete a college degree. (Nachazel and Dziuba 2014) And the statistics for students living in poverty are far worse. This is one of many reasons why Roger Cook and the Taylor County Schools are of particular

interest. Any district with a 61% poverty rate and over 40% of students attending college and zero (yes, zero) dropouts deserves to be examined.

Prioritizing the Common Core Mar 15 2021 The consensus among educators nationwide is that in-depth instruction paired with focused assessment of essential concepts and skills are far more effective than superficially covering every concept and skill in the standards. Educators are faced with the task of teaching all standards while meeting the extraordinary range of student learning needs. Prioritizing the Common Core offers common sense solutions to the dilemmas teachers face today in implementing the new, more rigorous national standards. Chapters present a rationale for prioritizing the Common Core, a step-by-step process for prioritizing standards in language arts and mathematics, strategies for soliciting feedback and input from everyone in the district or school prior to the final determination of the Priority Standards, and detailed summaries of the process schools in six different districts used to identify their Priority Standards, with accompanying commentary by those who directed the work.

The Common Core Companion: The Standards Decoded, Grades 6-8 Sep 28 2019 I love what Jim Burke has done to make the Standards less threatening and more useful for teachers. In particular, the indicators for what students and teachers should be doing, given the Standard, are extremely helpful; as are such a clear glossary and illuminating examples. All in all, The Common Core Companion is bound to be enormously useful and thus dog-eared! - Grant Wiggins, President, Authentic Education, Hopewell, NJ That version of the 6-8 standards you wish you had Don't spend another minute poring over the standards. Jim Burke has already done the hard work for you with this roadmap of what each standard says, what each standard means, and how precisely to put that standard into practice across English Language Arts, Social Studies, Science, and Technical Subjects. Jim clearly lays out: Grades 6-8 standards side by side with key distinctions Different content-area versions of each standard Explanations of each standard, with student prompts Content to cover, lesson ideas, and instructional techniques Glossary and adaptations for ELL students A longtime English teacher, Jim Burke is the author of more than 20 books and senior consultant for the Holt McDougal Literature program. Jim has received several awards, including the 2000 NCTE Exemplary English Leadership Award. In 2009, he created the English Companion Ning--the largest online community of English teachers in the world. More recently, Jim has served on the AP English Course and Exam Review Commission and the PARCC Consortium.

Minding the Achievement Gap One Classroom at a Time Mar 27 2022 The achievement gap is a persistent and perplexing challenge for educators. While school- and system-level reforms continue to be discussed in statehouses and district offices, individual teachers are challenged to do something now to help students who are falling short of standards, including students who are English language learners and receiving special education services. A companion to the ASCD best-seller *Improving Student Learning One Teacher at a Time*, this book identifies small, specific adjustments to planning, teaching, and assessment practices that will support more effective learning in every student, every day, and help close the achievement gap on a classroom-by-classroom basis. Here, you'll learn how to * Use readily available tools--curriculum documents, a plan book, and a grade book--to improve all students' access to, interaction with, and mastery of lesson content. * Design daily lessons that clarify learning goals and require students to use high-yield learning strategies, seek feedback, and reflect on their progress. * Promote the progress of English language learners through coordinated pursuit of content and language goals, and synchronize instruction to improve the performance of special education students in both co-teaching and resource environments. This book also features the voices of working educators who share how "minding the gap" has helped them engage academically at-risk students, ELLs, and special education students; improve students' test scores; and sustain these gains over time. If you are a classroom teacher or specialist committed to helping all your students become more successful learners and unwilling to wait for high-level solutions or even the results of another "data retreat," then this is just the resource you need.
