How to Get More from Your Satnav Oct 05 2022 Do you use a satnav or smartphone satnav app? If so, *How to Get More from Your Satnav* is for you? This unique exploration of the satnav, by an experienced professional driver, provides a penetrating analysis of the difficulties and problems associated with using it. In addition, a wealth of practical advice is offered and many fascinating insights. The 'bells and whistles' associated with satnavs are avoided and instead author Bob Scanlon concentrates on straightforward road navigation. The problem of arriving at the wrong destination is given an in-depth consideration and a simple practical solution offered. Route planning is explored and a range of techniques are proposed to help. Pointers are provided to advanced routing. How you use your satnav on the move is a much neglected area of concern and guidance and advice is provided here too. A review of a high specification satnav with HD live traffic is included and lastly, the satnav as a concept is evaluated. This is a sorely needed contribution to the practice of road navigation and provides an invaluable guide to getting more from your satnav.

EU Competition Law Jun 20 2021 'This book should be in the library of every competition law practitioner and academic. The summary of cases is first class. But what makes it really stand out is the quality of the commentary and the selection of the material which includes not only the most important European judgements and decisions but also some of the leading cases from the US and European Member States.' Ali Nikpay, Gibson, Dunn & Crutcher LLP This unique book is designed as a working tool for the study and practice of European competition law, focused on case law analysis. Each chapter begins with an introduction which outlines the relevant laws, regulations and guidelines for each of the topics, setting the analytical foundations for the case entries. Within this framework, cases are reviewed in summary form, accompanied by useful analysis and commentary. The 7th edition includes recent judgments from the European Court of Justice on the scope of object and effects based analysis (including Generics and Budapest Bank), as well as those on abuse of dominance. It examines developments in parallel trade, online sales restrictions, advertising bans, enforcement powers and procedure. Expanding its coverage of

merger decisions, it explores non-collusive oligopoly (including CK Telecoms) and the treatment of innovation and data under the EU Merger Regulation. This unique book offers the practitioner and competition law student an insightful guide to EU competition law cases, an understanding of which is crucial. Rigorous, comprehensive and authoritative, it simply is a must read.

Between Providence and Choice Biography Jan 28 2022 Many Christians struggle with the topic of divine guidance. Yet, treatments of such guidance often do insufficient justice to the theological complexities underneath the practical questions. Therefore, in this book the author develops a Reformed approach to guidance using a systematic theological approach. First, he develops a typology of approaches to guidance in contemporary evangelicalism. This typology uncovers a number of underlying theological questions, which are discussed through extensive interactions with the writings of John Calvin and Jonathan Edwards. Based upon these interactions, the author proposes a Reformed approach to divine guidance in which vocation, wisdom, discernment, and transformation are central concepts. Furthermore, this approach to guidance emphasizes the importance of the Christian community and the ongoing influence of the Holy Spirit.

Knowledge Engineering: Practice and Patterns Jul 22 2021 Knowledge Management and Knowledge Engineering is a fascinating ?eld of re-

I search these days. In the beginning of EKAW , the modeling and acquisition of knowledge was the privilege of – or rather a burden for – a few knowledge engineers familiar with knowledge engineering paradigms and knowledge representation formalisms. While the aim has always been to model knowledge declaratively and allow for reusability, the knowledge models produced in these early days were typically used in single and very specific applications and rarely - changed. Moreover, these models were typically rather complex, and they could be understood only by a few expert knowledge engineers. This situation has changed radically in the last few years as clearly indicated by the following trends: – The creation of (even formal) knowledge is now becoming more and more collaborative. Collaborative ontology engineering tools and social software platforms show the potential to leverage the wisdom of the crowds (or at least of “the many”) to lead to broader consensus and thus produce shared models which qualify better for reuse. – A trend can also be observed towards developing and publishing small but 2 3 4 high-impact vocabularies (e.g., FOAF , DublinCore , GoodRelations) rather than complex and large knowledge models.
